Or. en

Amendment 137
Monika Hohlmeier

Proposal for a regulation
Recital 1 b (new)

Text proposed by the Commission	*Amendment*
	(1b) The Commission and Member States should guarantee that the bureaucratic burden is reduced by at least 30% for all beneficiaries and recipients of EU funding. The Commission and Member States should ensure that the different digital systems are interconnected, interoperable and compatible with the relevant European IT-Systems. Data should be submitted once and automatically transferred to European systems. Local and regional authorities should benefit from a significant reduction in bureaucratic burden via this new digitalisation and transfer of data.

Recital 4 a (new)

Text proposed by the Commission	*Amendment*
	(4a) In order to ensure that the strategic priorities of the Union are adequately reflected in the priorities of the Union budget, competitiveness should be mainstreamed through the entire Union budget. To this end, a tracking of the contribution of activities to competitiveness should be enabled, in order to reflect their Union added value.

Amendment 163
Janusz Lewandowski

Proposal for a regulation
Recital 5

Text proposed by the Commission	*Amendment*
(5) The streamlined application of the 'do no significant harm' principle where feasible and appropriate, as referred to in Article 33(2), point (d) of Regulation (EU, Euratom) 2024/2509 should be based on a single and simple guidance. The Commission should provide this technical guidance by 1 January 2027. That guidance should be based on the overarching principles of clarity, simplification and proportionality, having regard to the principles of economy, efficiency and effectiveness and to achieving the set objectives of the programme or instrument in line with the Union's policy priorities. It should take into due consideration the high levels of protection to human health and the environment provided by existing EU legislation, and the need to avoid duplication with those requirements.	***deleted***

Amendment 164
Ruggero Razza, Carlo Fidanza

Proposal for a regulation
Recital 5

Text proposed by the Commission	*Amendment*
(5) The streamlined application of the 'do no significant harm' principle where feasible and appropriate, as referred to in Article 33(2), point (d) of Regulation (EU, Euratom) 2024/2509 should be based on a single and simple guidance. The Commission should ***provide*** this technical guidance by 1 January 2027. That guidance should be based on the overarching principles of clarity, simplification and proportionality, having regard to the principles of economy, efficiency and effectiveness and to achieving the set objectives of the programme or instrument in line with the Union's policy priorities. It should take into due consideration the high levels of protection to human health and the environment provided by existing EU legislation, and the need to avoid duplication with those requirements.	(5) The streamlined application of the 'do no significant harm' principle where feasible and appropriate, as referred to in Article 33(2), point (d) of Regulation (EU, Euratom) 2024/2509 should be based on a single and simple guidance. The Commission should ***adopt*** this technical guidance ***by means of an implementing act, following close consultation with Member States,*** by 1 January 2027. That guidance should be based on the overarching principles of clarity, simplification and proportionality, having regard to the principles of economy, efficiency and effectiveness and to achieving the set objectives of the programme or instrument in line with the Union's policy priorities. ***The guidance should not contain lists of activities deemed automatically non-compliant with the principle and therefore excluded from Union funding.*** It should take into due consideration the high levels of protection to human health and the environment provided by existing EU legislation, and the need to avoid duplication with those requirements. ***To that end, activities in compliance with relevant Union environmental legislation should be deemed compliant with the principle, unless there is evidence to the contrary. The guidance should reflect the diversity of economic sectors and their different decarbonisation pathways. For sectors where full compliance with environmental objectives requires long-term technological transitions and where no feasible low-carbon alternative is***

available at scale, such as steel, cement and chemicals, the guidance should provide for proportionate and time-limited approaches that support the transition without preventing access to Union funding.

Recital 6 a (new)

Text proposed by the Commission	*Amendment*
	(6 bis) Es fundamental garantizar que la competitividad de la economía europea constituya un principio rector y prioritario en la definición y aplicación de los

objetivos de la Unión, incluidos los establecidos en el marco de seguimiento del gasto presupuestario y de rendimiento. La consecución de dichos objetivos no debe producirse en detrimento de la competitividad de las empresas europeas, especialmente de las pequeñas y medianas empresas (pymes), ni comprometer su capacidad de crecimiento y desarrollo. Por consiguiente, resulta esencial garantizar que las políticas de la Unión, incluida la transición ecológica, respeten y salvaguarden el principio de competitividad, evitando la imposición de costes desproporcionados y preservando la capacidad productiva europea.

Amendment 201
Thomas Pellerin-Carlin, Jean-Marc Germain
on behalf of the S&D Group

Proposal for a regulation
Recital 7 b (new)

Text proposed by the Commission	*Amendment*
	(7b) The joint commitment of the European Parliament, the Council and the Commission recognises the relevance of international human and labour rights and standards, to pursuing compliance with minimum safeguards as a condition for economic activities to qualify as sustainable. For that reason, economic activities financed under the EU budget should be carried out in alignment with the OECD Guidelines for Multinational Enterprises and UN Guiding Principles on Business and Human Rights, including the declaration on Fundamental Principles and Rights at Work of the International Labour Organisation (ILO), the eight fundamental conventions of the ILO and the International Bill of Human Rights. Several of those international standards are enshrined in the Charter of Fundamental Rights of the European Union, in particular the prohibition of slavery and forced labour and the principle of non-discrimination. Those minimum safeguards are without prejudice to the application of more stringent requirements related to the environment, health, safety and social sustainability set out in Union law.

om het gendergelijkheidsbeginsel consequent toe te passen. In deze verordening moet met name de methode voor gendermainstreaming worden vastgesteld, voortbouwend op de methode die de Commissie in het kader van het MFK 2021-2027 heeft ontwikkeld en die voor het eerst voor het begrotingsjaar 2021 werd gebruikt om de uitgaven die bijdragen aan gendergelijkheid te meten door middel van scores op basis van de doelstellingen van activiteiten die door de programma's van de Unie worden ondersteund. De Commissie moet verdere richtsnoeren verstrekken om te zorgen voor een consistente toepassing van dit beginsel. In deze verordening moet voorts worden gespecificeerd welke met betrekking tot de prestatie-indicatoren verzamelde gegevens, voor zover haalbaar en passend, naar geslacht moeten worden uitgesplitst.

Text proposed by the Commission	*Amendment*
(8) In line with Article 8 TFEU, the Union shall in all its activities aim to eliminate inequalities, and to promote equality, between men and women. Article 33(2), point (e), of Regulation (EU, Euratom) 2024/2509 therefore lays down the requirement for the implementation of programmes and activities to take into account the principle of gender equality in accordance with an appropriate gender mainstreaming methodology, where feasible and appropriate. This Regulation	(8) ***Gender equality is a core value of the Union as enshrined in Article 2 of the Treaty on European Union.*** In line with Article 8 TFEU, the Union shall in all its activities aim to eliminate inequalities, and to promote equality, between men and women***, thus establishing the principle of gender mainstreaming which stipulates that the gender equality perspective must be integrated across all policies and programmes, including all levels of the budgetary process***. Article 33(2), point (e),

should therefore establish a single set of rules to implement the principle of gender equality consistently. In particular, this Regulation should set out the gender mainstreaming methodology, building on the methodology developed by the Commission under the 2021-2027 MFF and used for the first time for the financial year 2021, to measure expenditure contributing to gender equality through a system of scores based on the objectives pursued by activities supported under Union programmes. Further guidance should be provided by the Commission to ensure the consistent application of that principle. This Regulation should also specify ***which data*** collected in relation to performance indicators should be broken down, ***where feasible and appropriate,*** by gender.

of Regulation (EU, Euratom) 2024/2509 therefore lays down the requirement for the implementation of programmes and activities to take into account the principle of gender equality in accordance with an appropriate gender mainstreaming methodology, where feasible and appropriate. This Regulation should therefore establish a single set of rules to implement the principle of gender equality consistently. In particular, this Regulation should set out the gender mainstreaming methodology, building on the methodology developed by the Commission under the 2021-2027 MFF and used for the first time for the financial year 2021, to ***promote the systematic integration into all programmes and to*** measure expenditure contributing to gender equality through a system of scores based on the objectives pursued by activities supported under Union programmes. ***The figures show that only 12 % of the Union budget (EUR 158.4 billion) between 2021 and 2024 supported gender equality. The further development of the gender equality tracking methodology should be grounded in the international standards developed by the OECD and should incorporate the recommendations set out in the European Court of Auditors' special report on gender mainstreaming in the budget.*** Further guidance should be provided by the Commission to ensure the consistent application of that principle***, including the establishment of minimum criteria linking the attribution of gender equality scores to gender equality-specific objectives, and to the systematic use of ex ante and ex post gender impact assessments and gender analysis. This Regulation should also ensure improved collection, reporting and evaluation of comparable gender-disaggregated data and should allow to identify not only the beneficiaries of the funds, but also the transformative potential and gender equality impact of the programmes and actions***. This Regulation should also specify ***that data on persons*** collected in relation to

performance indicators should be broken down, by gender. ***The European Institute for Gender Equality (EIGE) should provide technical assistance to determine the categories and corresponding gender equality scores with the aim to avoid fragmentation and ensure a consistent interpretation and application across all Union programmes and instruments, and work closely with the Commission for drafting the guidance. The guidance should be in line with OECD standards and should establish minimum criteria, including ex ante gender analysis, explicit gender equality objectives to be linked to the attribution of each gender equality score. The EIGE, in line with its mandate, should support the Commission in the implementation of gender mainstreaming in the MFF, provide methodological support and capacity building for Union institutions and Member States, and promote the sharing and adoption of best practices.***

Amendment 221
Thomas Pellerin-Carlin, Jean-Marc Germain
on behalf of the S&D Group

Proposal for a regulation
Recital 10

Text proposed by the Commission	*Amendment*
(10) The Charter of Fundamental Rights of the European Union prohibits discrimination on the grounds of disability and guarantees the right of persons with disabilities to independence, social and occupational integration, and participation in community life. Moreover, the Union is party to the UN Convention on the Rights of Persons with Disabilities, which requires that the protection and promotion of the human rights of persons with disabilities is taken into account in all policies and programmes. The budget should therefore ensure the effective promotion of the rights of persons with disabilities and their equal opportunities as well as aim to remove any inequalities, where feasible and appropriate. In particular, programmes and activities should aim to ensure accessibility for persons with disabilities in all infrastructures, products and services, including in the built environment, in transport and in information and communication also concerning information and communication technologies. They should also aim to support independent living ***and promote*** the transition from residential or institutional care to family and community-based services ***and*** support.	(10) The Charter of Fundamental Rights of the European Union prohibits discrimination on the grounds of disability and guarantees the right of persons with disabilities to independence, social and occupational integration, and participation in community life ***and decision-making***. Moreover, the Union is party to the UN Convention on the Rights of Persons with Disabilities, which requires that the protection and promotion of the human rights of persons with disabilities is taken into account in all policies and programmes ***and that all appropriate measures are taken to eliminate discrimination on the basis of disability, to ensure that persons with disabilities can live independently and that they are included in the community***. The budget should therefore ensure the effective promotion of the rights of persons with disabilities and their equal opportunities as well as aim to remove any inequalities, where feasible and appropriate. In particular, programmes and activities should aim to ensure accessibility for persons with disabilities in all infrastructures, products and services, including in the built environment, in transport and in information and communication also concerning

information and communication technologies. They should also aim to support independent living ***through income and employment support, by promoting*** the transition from residential or institutional care to family and community-based services ***or housing, by offering*** support ***in case of crisis situations, and by ensuring more widely that the support needs of all persons with disabilities are met. Particular emphasis should be placed on deinstitutionalisation projects, projects to improve the provision of community-based services, personal budgets and personal budget schemes, and Centres for Independent Living Programmes. Funded activities should support access to affordable and accessible housing in the community, aim to reduce the disability employment gap by funding supported employment, increase the beneficiaries of supported decision-making, and provide funding for persons with disabilities affected by crisis situations within and outside the EU.***

Proposal for a regulation
Recital 10 a (new)

Text proposed by the Commission	*Amendment*
	(10a) Where relevant, evaluations should also assess the extent to which programmes contribute to reducing inequalities and discrimination affecting Roma and other groups facing structural exclusion.

Or. en

Justification

The amendment aligns the evaluation of programmes with existing EU commitments on equality and Roma inclusion. It ensures that, where relevant, Member States assess whether EU-funded measures effectively contribute to reducing persistent inequalities affecting Roma, thereby strengthening evidence-based policymaking and accountability without introducing additional obligations.

Text proposed by the Commission	*Amendment*
(12) The economic, financial and social costs linked to climate change, natural hazards, health emergencies, technological accidents, evolving security threats, and other disruptions are growing. It is essential to enhance the Union's and Member States' capability to anticipate, prepare for, and respond to crises disasters, and impacts of climate change, to protect the investments under the EU budget, as well as to reinforce internal security. Therefore, preparedness and climate resilience by design should ensure that relevant programmes and activities support reforms and investments that strengthen disaster risk and crises management, invest in climate resilience, enhance the resilience of vital societal functions, and build a more resilient, secure, and prepared societies, in line with the objectives of the EU Preparedness Union Strategy,[7] the ProtectEU Strategy[8] and the EU obligation under Article 5 of Regulation (EU) 2021/1119[9] (the 'European Climate Law') to reduce vulnerability to climate change.	(12) The ***human,*** economic, financial***, environmental*** and social costs linked to climate change***, including extreme weather events***, natural hazards, health emergencies, technological accidents, evolving security threats, and other disruptions are growing. ***As the European Environment Agency's European Climate Risk Assessment makes clear, Europe is the fastest-warming continent and climate-related hazards such as extreme heat, drought, flooding and wildfire increasingly threaten human life and health, infrastructure and financial stability. Such risks can cascade across systems and regions and do not stop at national borders. Assets and investments financed by the budget are exposed to those hazards over their lifetime, and expenditure that is not designed to withstand them risks premature failure, stranded value and repeated recourse to public funds*** It is essential to enhance the Union's and Member States' capability to anticipate, prepare for, and respond to crises disasters, and impacts of climate change, to protect the investments under the EU budget, as well as to reinforce internal security. Therefore, preparedness and climate resilience by design should ensure that relevant programmes and activities support reforms and investments that strengthen disaster risk ***preparedness*** and crises management ***capabilities***, invest in climate resilience, enhance the resilience of vital societal functions, and build a more resilient, secure, and prepared societies, in line with the objectives of the EU Preparedness Union Strategy,[7] the ProtectEU Strategy[8] and the EU obligation under Article 5 of Regulation (EU) 2021/1119[9] (the 'European Climate Law') to reduce vulnerability to climate change. ***To that end, physical infrastructure financed by the budget should be subject to a prior climate resilience check, based on a single methodology developed by the***

Commission, drawing on the best available scientific evidence, including the work of the European Environmental Agency and its European Climate Risk Assessment. The climate resilience check complements the 'do no significant harm' principle: whereas the principle ensures that expenditure does not harm environmental objectives, the climate resilience check ensures that the expenditure is itself protected against the impacts of climate change and ensures the long-term effectiveness of the investment in question.

Amendment 239
Rasmus Nordqvist, Daniel Freund
on behalf of the Verts/ALE Group

Proposal for a regulation
Recital 12 a (new)

Text proposed by the Commission	*Amendment*
	(12a) Climate change and its security consequences are one of the horizontal threats identified by the Defence Readiness Roadmap 2030. The Climate Change and Defence Roadmap indicated how climate policy implications should become an integral part of the EU's thinking and action on issues such as defence research and development, industry and technology or infrastructure, as well as the EU CSDP, with the aim to reduce the emissions in particular in the

defence sector as part of the collective effort towards climate neutrality by 2050, increased energy sustainability, the prioritisation of energy efficiency, and the protection of biodiversity. The European Parliament called to systematically include climate and environmental considerations in military technology, research, procurement and infrastructure and to adopt an approach incorporating a low energy, carbon and environmental footprint by design for Union financing for military and dual-use technology and capabilities, in particular by seeking greater energy efficiency in terms of renovation and the adapted use of renewable energy. Following these recommendations, spending for defence and security should be included in the basis for the calculation of the climate and environment spending target laid out in Article 4 of this Regulation and comply with the 'do not significant harm principle' in accordance with Article 5.[1a]

on behalf of the S&D Group

Proposal for a regulation
Recital 12 a (new)

Text proposed by the Commission	*Amendment*
	(12a) Taking into account Articles 174 and 349 TFEU, the performance monitoring framework should recognise the specific constraints of rural areas, areas affected by industrial transition, and regions which suffer from severe and permanent natural or demographic handicaps such as regions with very low population density and island, cross border, and mountain regions as well as outermost regions. The framework should provide for those specific circumstances to be incorporated into the design and assessment of the performance indicators, and for the regional and local authorities concerned to be involved in the relevant monitoring and reporting mechanisms, in order to ensure that EU funds are used more efficiently and fairly in those areas and in order to give operational effect to the right to stay principle.

Under that system[10] , a coefficient of 100 % is assigned to activities expected to make a substantial contribution to climate change mitigation or adaptation objectives in line with Union climate goals, a coefficient of 40 % is assigned to activities expected to make a non-marginal, positive contribution to climate change mitigation or adaptation objectives, and a coefficient of 0 % is assigned to activities expected to have a neutral impact on climate objectives. For a number of activities, EU climate coefficients reflect the technical screening criteria of the EU Taxonomy of sustainable activities.

Amendment 269
Stine Bosse, Gerben-Jan Gerbrandy

Proposal for a regulation
Recital 17

Text proposed by the Commission	*Amendment*
(17) The tracking approach provided under this Regulation will enable the Commission to continue reporting on its Official Development Assistance to the Development Assistance Committee of the Organisation for Economic Co-operation and Development.	(17) The tracking approach provided under this Regulation will enable the Commission to continue reporting on its Official Development Assistance to the Development Assistance Committee of the Organisation for Economic Co-operation and Development. ***The contribution from the budget to Official Development***

Assistance, in accordance with the list adopted by the OECD Development Assistance Committee (OECD-DAC), should be monitored by means of the budget expenditure tracking and performance framework laid down in this Regulation, and should be reported on annually, in accordance with and in continuation of the result frameworks already developed for external action. The performance framework should take into account the spending targets for external action laid down in Regulation (EU) [...] establishing Global Europe and the Union's international commitments. Any financial resources allocated under external action, including through budgetary guarantees, public-private partnerships and blended finance instruments, should be tracked under the same framework for assessing their performance against the Union's objectives and horizontal principles.

Amendment 298
Rasmus Nordqvist, Daniel Freund
on behalf of the Verts/ALE Group

Proposal for a regulation
Recital 20 a (new)

Text proposed by the Commission	*Amendment*
	(20a) Despite the fact that rural areas are home to a significant share of the Union's population, they face persistent disparities in access to essential services - including water management, distribution and sanitation, affordable housing, healthcare, digital connectivity and public transport – which continue to drive demographic decline and undermine the capacity of citizens to remain in the communities of their choice. The principle of the right to stay, understood as the right of people to remain in their local community without being forced to migrate due to a lack of opportunities, is an expression of the Union's commitment to territorial cohesion enshrined in Article 174 TFEU. In order to give operational effect to that principle, the performance framework established by this Regulation should ensure that Union budget expenditure for essential services contributes meaningfully to improving the quality of life in rural areas. To this end, Member States should report on the geographic distribution of supported operations and their beneficiaries, disaggregated by degree of urbanisation as set out in Annex II part II. For that purpose, rural areas shall be identified on the basis of the Degree of Urbanisation (DEGURBA) classification at local administrative unit (LAU) level, as established by Eurostat within the territorial typologies framework introduced by Regulation (EU) 2017/2391 of the European Parliament and of the Council[17a].
	[17a] Regulation (EU) 2017/2391 of the

European Parliament and of the Council of 12 December 2017 amending Regulation (EC) No 1059/2003 as regards the territorial typologies (Tercet)(OJ L, 350, 29.12.2017).

Amendment 302
Niclas Herbst, Jean-Marc Germain

Proposal for a regulation
Recital 20 b (new)

Text proposed by the Commission	*Amendment*
	(20b) The aggregration of performance

data reported by Member States at the Union level and the comparability of the evaluation reports drawn up by Member States concerning shared management should be ensured through evaluation roadmaps that follow a common template and common quality standards defined by the Commission. To effectively prevent conflict of interest in accordance with Article 61(1) of Regulation (EU, Euratom) 2024/2509, this Regulation lays down specific requirements for independent experts responsible for carrying out evaluations in the Member States. Where evaluations submitted by Member States do not meet the requirements, the Commission should be allowed to require additional information on the evaluation, or its revision or repetition.

Or. en

Amendment 303
Rasmus Nordqvist, Daniel Freund
on behalf of the Verts/ALE Group

Proposal for a regulation
Recital 20 b (new)

Text proposed by the Commission	*Amendment*
	(20b) Where Union funding takes the form of financing not linked to costs, an assessment of efficiency and value for money requires information on the costs of the measures financed. Evaluations should therefore use the information on estimated and actual costs collected under sector-specific rules, in line with the recommendations of the European Court of Auditors.

Or. en

Amendment 304
Bert-Jan Ruissen, Dick Erixon

Proposal for a regulation
Recital 20 b (new)

Text proposed by the Commission	*Amendment*
	(20b) In order to prevent fraud and protect the financial interests of the Union, Member States and third countries should provide the Commission with an annual list of final recipients of Union funding implemented through national plans. The definition of final recipients should also include indirect financing through the Union budget.

Or. en

Amendment 305
Niclas Herbst, Jean-Marc Germain

Proposal for a regulation
Recital 20 c (new)

Text proposed by the Commission	*Amendment*
	(20c) For the performance framework to be meaningful, it is of utmost importance that performance data provided by Member States and implementing partners to the Commission meet the standards of quality, reliability and assurance. This Regulation therefore defines various requirements for the reporting systems of Member States as regards shared management as well as control mechanisms for the Commission to ensure that Member States comply with their obligations.

Or. en

Amendment 306
Rasmus Nordqvist, Daniel Freund

on behalf of the Verts/ALE Group

Proposal for a regulation
Recital 20 c (new)

Text proposed by the Commission	*Amendment*
	(20c) The Commission should monitor progress towards the achievement of the spending targets. Where there is a risk that a target will not be achieved, the Commission should be able to issue recommendations for corrective measures. Such recommendations could, for example, concern future budgetary commitments or be addressed to Member States or implementing partners regarding the intervention fields assigned to activities under their programmes.

Amendment 330
Niclas Herbst, Jean-Marc Germain

Proposal for a regulation
Recital 24 a (new)

Text proposed by the Commission	*Amendment*
	(24a) Any processing of personal data pursuant to this Regulation should take place in accordance with Regulation (EU) 2016/679 of the European Parliament and of the Council ('GDPR')[1] or Regulation (EU) 2018/1725 of the European Parliament and of the Council ('EUDPR')[2], whichever is applicable. In particular, it should be ensured, in line with the principle of 'data minimisation', that personal data are adequate, relevant and limited to what is necessary in relation to the purposes for which they are processed. For example, where the identification of a person is required, this may concern the person's name, surname, birth date, national identification number, and social security code, while the processing of additional data concerning beneficiaries such as employment status, education, skills and socio-demographic characteristics may be required for evaluation purposes. [1] Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation) (OJ L 119, 4.5.2016, p. 1). [2] Regulation (EU) 2018/1725 of the European Parliament and of the Council of 23 October 2018 on the protection of natural persons with regard to the processing of personal data by the Union institutions, bodies, offices and agencies and on the free movement of such data, and repealing Regulation (EC) No 45/2001 and Decision No 1247/2002/EC (OJ L 295, 21.11.2018, p. 39).

(25) Il convient de déléguer à la Commission le pouvoir d'adopter des actes conformément à l'article 290 du traité sur le fonctionnement de l'Union européenne en ce qui concerne: la modification de la liste des domaines d'intervention et des indicateurs de performance figurant à l'annexe I du présent règlement; la modification des codes pour la dimension territoriale visés à l'annexe II; la modification des objectifs spécifiques de dépenses pour le climat et l'environnement visés à l'annexe III; la modification de la liste des programmes pertinents pour l'égalité de genre figurant à l'annexe IV du présent règlement; la modification de l'annexe V du présent règlement sur l'information, la communication et la visibilité; et la modification des dispositions relatives au portail unique, le cas échéant. Il importe particulièrement que la Commission procède aux consultations appropriées durant son travail préparatoire, y compris au niveau des experts, et que ces consultations soient menées conformément aux principes définis dans l'accord interinstitutionnel du 13 avril 2016 «Mieux légiférer»[11] . En particulier, pour assurer leur égale participation à la préparation des actes délégués, le Parlement européen et le Conseil reçoivent tous les documents au même moment que les experts des États membres, et leurs experts ont systématiquement accès aux réunions des groupes d'experts de la Commission traitant de la préparation des actes délégués.	***supprimé***

Amendment 346
Bert-Jan Ruissen, Dick Erixon

Proposal for a regulation
Recital 25 a (new)

Text proposed by the Commission	*Amendment*
	(25a) This Regulation is the first performance framework that is applicable to the entire MFF. Therefore, it should be evaluated four years after its entry into force. The evaluation should cover the suitability of a single Performance Regulation for the entire budget, the general cost-effectiveness of programmes under the Union budget, the protection of the Union's financial interests, the accuracy of the EU coefficients in Annex I, the suitability of the intervention fields and performance indicators, and the Union added value of Union funding. The Regulation should be updated if appropriate.

Amendment 347
Ruggero Razza, Carlo Fidanza

Proposal for a regulation
Recital 25 a (new)

Text proposed by the Commission	*Amendment*
	(25a) In order to ensure uniform conditions for the implementation of this Regulation, implementing powers should be conferred on the Commission as regards the adoption of the 'do no significant harm' guidance. Those powers should be exercised in accordance with Regulation (EU) No 182/2011 of the European Parliament and of the Council[1a], under the examination procedure. Given the direct impact of that guidance on access to Union funding, the Commission should not adopt the draft implementing act where the committee delivers no opinion.
	[1a] Regulation (EU) No 182/2011 of the

European Parliament and of the Council of 16 February 2011 laying down the rules and general principles concerning mechanisms for control by Member States of the Commission's exercise of implementing powers (OJ L 55, 8.2.2011).

Proposal for a regulation
Article 3 a (new)

Text proposed by the Commission	*Amendment*
	Article3a

Correction Mechanism

1. Where there is insufficient progress made towards one or more of the spending targets defined in this Regulation, the Commission shall, in accordance with Article 33(1) of Regulation (EU, Euratom) 2024/2509, propose in the draft budget for the following year the adjustments necessary to ensure the achievement of those targets. The Union institutions shall take all the necessary measures to ensure that the Union achieves the spending objectives and targets over the 2028-2034 multiannual financial framework set out in this Regulation.

2. For the budget implemented under shared management, Member States shall ensure that their plans are designed and implemented to meet the horizontal and programme-specific targets established in this Regulation. Where the annual performance monitoring reveals that a Member State has failed to meet the spending targets, the Member State shall propose remedial measures and necessary adjustments to its plan to ensure the achievement of targets in subsequent years. Those measures shall be submitted to the Commission without delay.

3. Where a Member State fails to implement the required remedial measures or persistently falls significantly below the spending targets without objective justification, the Commission shall be empowered to apply financial corrections in accordance with the degree of non-compliance and the impact on the Union's horizontal objectives.

4. When presenting the draft estimates of the Union budget for the year n+1, the Commission shall present programme-specific performance statements, so as to inform the budgetary and discharge authorities about the programme-specific performance in relation to the horizontal principles and spending targets in this Regulation.

Amendment 428
Anouk Van Brug, Joachim Streit

Proposal for a regulation
Article 3 a (new)

Text proposed by the Commission	*Amendment*
	Article3a
	No additional burden for recipients
	1. This Regulation shall not impose on applicants, recipients or final recipients any eligibility, selection or award criteria, or any verification, documentation or reporting requirements, in addition to those laid down in applicable Union and national law and in the sector-specific rules.
	2. Information and documentation requested from applicants, recipients and final recipients for the purposes of Articles 4 to 7 shall be limited to what is strictly necessary.
	3. Applicants, recipients or final recipients shall not be requested to provide information already submitted to any public authority or available in public registers.
	4. The horizontal principles referred to in Articles 4 to 7 shall be applied without undermining or delaying the achievement of the objectives of the programme or activity concerned. Where their application would undermine or delay the achievement of those objectives, it shall be considered not feasible or appropriate within the meaning of Article 33(2) of Regulation (EU, Euratom) 2024/2509.
	5. This Article is without prejudice to the obligations ensuring the traceability of Union funds, including the identification of recipients and final recipients, the amounts received, the operations financed

contec OBTAINED BY THE EP

and their outputs and results, and to the requirements on audit, control and the protection of the Union's financial interests, including access for the Commission, the European Anti-Fraud Office, the European Public Prosecutor's Office and the European Court of Auditors.

Or. en

Justification

The proposal aims to reduce administrative burden for recipients by at least 25%. This Article ensures that horizontal principles do not add requirements beyond existing law, while Union funds remain fully traceable. As stated in the explanatory memorandum of the proposal, horizontal principles should be applied without undermining the achievement of a programme's objectives. Union funding should be judged on whether it delivers, not on how many horizontal requirements it meets.

Amendment 429
Jean-Marc Germain, Thomas Pellerin-Carlin
on behalf of the S&D Group

Proposal for a regulation
Article 3 b (new)

Text proposed by the Commission	*Amendment*
	Article3b
	Application of the performance framework
	1. This Regulation shall apply to all Union programmes, instruments, funds and activities financed wholly or partly from the Union budget.
	2. Sector-specific rules may complement this Regulation provided that they are consistent with its provisions and neither derogate from nor reduce the requirements or replace the standards laid down therein.
	3. In the event of a conflict between this Regulation and sector-specific rules, this Regulation shall prevail.

Proposal for a regulation
Article 4

Text proposed by the Commission	*Amendment*
Artículo 4	***suprimido***
Clima y biodiversidad	
1. Se efectuará el seguimiento de la aportación del presupuesto al clima y a la biodiversidad mediante el marco de rendimiento y rastreo del gasto del presupuesto establecido en el artículo 8, incluidos los coeficientes UE.	
2. Se llevarán a cabo programas y actividades con la pretensión de conseguir, en términos globales, que, a lo largo del marco financiero plurianual de 2028-2034, se gaste un mínimo del 35 % del presupuesto total en acción por el	

clima y fines medioambientales (el «objetivo de gasto climático y medioambiental»), calculado utilizando el coeficiente más alto de entre los correspondientes a la mitigación climática, a la adaptación y resiliencia climáticas y al medioambiente del marco a que se refiere el apartado 1. El gasto en defensa y seguridad quedará excluido de la base del cálculo del objetivo de gasto climático y medioambiental.

3. Los programas e instrumentos de la UE contribuirán a la consecución del objetivo de gasto climático y medioambiental definido en el apartado 2. En el anexo III se establecen las contribuciones concretas de determinados programas e instrumentos de la UE.

4. La Comisión está facultada para la adopción, conforme a lo dispuesto en el artículo 20, de actos delegados al objeto de ajustar los niveles de los objetivos de gasto climático y medioambiental definidos en el anexo III al objeto de que tengan en cuenta las novedades producidas durante la ejecución de los programas, tales como un rendimiento por encima o por debajo de los objetivos, o de que reflejen las nuevas prioridades que surjan en la ejecución de los programas.

5. En caso de que no haya avances suficientes hacia el objetivo de gasto climático y medioambiental en uno o varios de los programas pertinentes, las instituciones, de conformidad con sus responsabilidades y la legislación pertinente, se consultarán sobre las medidas adecuadas que deban adoptarse para garantizar que el gasto de la Unión en fines climáticos y medioambientales durante el marco financiero plurianual de 2028-2034 corresponda a un mínimo del 35 % del importe total del presupuesto de la Unión.

Amendment 436
Dick Erixon

Proposal for a regulation
Article 4

Text proposed by the Commission	*Amendment*
Article 4	***deleted***
Climate and biodiversity	
1. The contribution from the budget to climate and biodiversity shall be monitored by means of the budget expenditure tracking and performance framework laid down in Article 8, including by means of EU coefficients.	
2. Programmes and activities shall be implemented with a view to achieving an overall spending target of at least 35% of the total amount of the budget on climate action and environmental objectives ('climate and environment spending target') over the entire 2028-2034 multiannual financial framework, calculated by using the highest coefficient amongst climate mitigation, climate adaptation and resilience, and environment of the framework referred to in paragraph 1. Defence and security spending shall be excluded from the basis for the calculation of the climate and environment spending target.	
3. EU programmes and instruments shall contribute to reaching the climate and environment spending target defined in paragraph 2. The specific contribution of some EU programmes and instruments is laid out in Annex III.	
4. The Commission is empowered to adopt delegated acts in accordance with Article 20 to adjust the levels of the climate and environment spending targets defined in Annex III to take into account developments during the implementation of the programmes, including the under- or over-achievement of the targets, or to reflect new priorities within the	

contexte OBTAINED BY · OBTENU PAR

implementation of programmes.

5. Where there is insufficient progress towards the climate and environment spending target in one or more of the relevant programmes, the Institutions, in accordance with their responsibilities and the relevant legislation, will consult each other on appropriate measures to be taken to ensure that Union spending on climate and environment objectives over the 2028-2034 multiannual financial framework corresponds to at least 35% of the total amount of the Union budget.

Amendment 503
Monika Hohlmeier

Proposal for a regulation
Article 4 a (new)

Text proposed by the Commission	*Amendment*
	Article 4a
	Article 4a Competitiveness, Innovation and Crisis Preparedness mainstreaming
	1. Programmes and activities shall aim to mainstream competitiveness as the ability of European companies to compete successfully in global markets through, among other things, strenghtening the

Single Market, establishing a level playing field, reducing the cost of doing business, digitalisation, supporting SMEs and industrial ecosystems, addressing missing links in terms of connectivity, supporting innovation and research and reducing strategic dependencies.

Moreover, programmes and activities shall aim to mainstream resilience and crisis preparedness as the ability of the Union, its Member States, regions, societies and economies to anticipate, prevent, prepare for, withstand, respond to, adapt to and recover from shocks, crises and structural challenges, while maintaining essential functions and ensuring long-term sustainability. This shall include, among other things, strengthening health resilience and preparedness for health emergencies, preventing and managing natural disasters, enhancing energy security and resilience, ensuring secure and diversified access to critical raw materials, strengthening technological and digital resilience, protecting critical infrastructure and supply chains, reinforcing food and water security, and strengthening societal, economic and institutional resilience.

2. The contribution from the budget to competitiveness, innovation and crisis preparedness mainstreaming shall be monitored by means of the budget expenditure tracking and performance framework laid down in Article 8, including by means of EU coefficients. The Commission shall adopt a delegated act one month after the entry into force of this Regulation to amend Annex I and establish coefficients to measure the contribution of each budget intervention towards competitiveness, innovation and crisis preparedness.

3. Programmes and activities shall be implemented with a view to achieving an overall spending target of at least 35% of the total amount of the budget on

competitiveness and innovation objectives, including crisis preparedness ('competitiveness spending target') over the entire 2028-2034 multiannual financial framework. Defence, border management, migration and security spending shall be excluded from the basis for the calculation of the competitiveness spending target.

4. Where there is insufficient progress towards the competitiveness spending target, the Institutions, in accordance with their responsibilities and the relevant legislation, shall consult each other on appropriate measures to be taken to ensure that Union spending on competitiveness, innovation and resilence objectives over the 2028-2034 multiannual financial framework corresponds to at least 35% of the total amount of the Union budget.

Amendment 505
Rasmus Nordqvist, Daniel Freund, Kai Tegethoff
on behalf of the Verts/ALE Group

Proposal for a regulation
Article 4 a (new)

Text proposed by the Commission	*Amendment*
	Article4a
	Climate resilience check
	1. In accordance with the requirements of Article 5 of Regulation (EU) 2021/1119, to reduce vulnerability to climate change, a climate resilience check shall be performed for physical infrastructure investments as well as upgrades thereof to ensure they are designed and implemented so as to be resilient to the current and projected impacts of climate change over their expected lifetime. If this is not complied with, the project shall not be financed from the Union budget in accordance with Article 33 (1) of Regulation (EU, Euratom) 2024/2509, in particular the principle of effectiveness.
	2. The Commission shall, by 1 January 2027, develop and provide a single

guidance for the application of the climate resilience check (the 'climate resilience check methodology'). That guidance shall be based on the best available scientific evidence, including the European Climate Risk Assessment, and shall have regard to the principles of clarity, simplification and proportionality. Proportionality shall be ensured in particular by taking into account the size of an activity, its expected lifetime, its exposure to climate-related hazards, and the territorial characteristics of the regions where the activity takes place.

3. The guidance referred to in paragraph 2 shall build on, and avoid duplication with, existing requirements under Union law, including climate-proofing requirements applicable to infrastructure investments, and shall not impose reporting burdens beyond what is necessary to demonstrate compliance.

Or. en

Amendment 506
Jana Nagyová, Klara Dostalova, Ondřej Knotek, Jaroslav Bžoch, Tomáš Kubín, Jaroslava Pokorná Jermanová, Kateřina Konečná

Proposal for a regulation
Article 4 a (new)

Text proposed by the Commission	*Amendment*
	Article4a
	Competitiveness
	1. Union programmes and activities shall support the strengthening of the Union's competitiveness where relevant to their specific objectives and in accordance with their respective legal bases.
	2. For the purposes of paragraph 1, particular regard shall be paid to productivity, industrial capacity, research and innovation, digital transformation, access to affordable and secure energy,

and the reduction of strategic dependencies. Implementation shall respect technological neutrality in accordance with applicable Union law and facilitate access to Union funding, in particular for small and medium-sized enterprises.

3. Where relevant to the objectives of the programme concerned, its contribution to competitiveness shall be monitored through the framework laid down in Article 8, using the relevant output and result indicators set out in Annex I, and reported on pursuant to Article 9(2).

4. The application of this Article shall not create additional eligibility conditions or reporting obligations for beneficiaries and shall not alter the objectives or allocation criteria laid down in the relevant sector-specific Union rules.

Or. en

Justification

The amendment establishes competitiveness as a genuine cross-cutting principle and links it to existing performance monitoring. It introduces no new quota, parallel reporting system or additional eligibility test for individual projects. It expressly safeguards the objectives and allocation criteria of each programme.

Amendment 507
Isabel Benjumea Benjumea

Proposal for a regulation
Article 5

Text proposed by the Commission	*Amendment*
Artículo 5	***suprimido***
«No causar un perjuicio significativo» a los fines medioambientales	
1. Un solo documento sencillo de orientación (el «documento orientativo sobre "no causar un perjuicio significativo"») facilitará una aplicación más ágil del principio de «no causar un	

perjuicio significativo» en los términos expuestos en el artículo 33, apartado 2, letra d), del Reglamento (UE, Euratom) 2024/2509.

2.

El documento orientativo a que se refiere el apartado 1 establecerá principios y criterios generales y, en su caso, criterios específicos para ámbitos de actuación concretos.

En particular, distinguirá entre los ámbitos de actuación o actividades que se estimen conformes al principio de «no causar un perjuicio significativo» en todo momento y los ámbitos de actuación o actividades que se estimen causantes de un perjuicio significativo a uno o varios fines medioambientales y, por tanto, no aptos para financiarse con cargo al presupuesto de la UE.

En el documento orientativo de la Comisión, se tendrá en cuenta la necesidad de cumplir los fines perseguidos en los programas o instrumentos de que se trate, siguiendo la línea marcada por las prioridades de actuación de la Unión, y de evitar la duplicidad con los requisitos ya establecidos en la normativa vigente de la UE, los elevados niveles de protección de la salud humana y del medio ambiente facilitados por dicha normativa, la carga administrativa y de presentación de información que se imponga a las administraciones y los beneficiarios y el principio de proporcionalidad.

Entre las formas en las que se garantizará la proporcionalidad destaca la toma en consideración del tamaño y los efectos climáticos y medioambientales de un proyecto y las características territoriales de las regiones en las que se vayan a desarrollar las actividades o, en su caso, del hecho de desarrollarse en terceros países.

3.

En el documento orientativo al que se refiere el apartado 1 se determinarán los supuestos en los que la aplicación del principio de «no causar un perjuicio significativo» puede ser inviable o inapropiado, por ejemplo las situaciones de crisis, incluidas las emergencias derivadas de catástrofes naturales, o cuando concurran otras razones imperiosas de interés general.

En este sentido, cabe destacar que se considerará inviable o inapropiada la aplicación del principio de «no causar un perjuicio significativo» a las actividades de defensa y de seguridad.

Amendment 508
Julien Sanchez, Angéline Furet, Virginie Joron

Proposal for a regulation
Article 5

Text proposed by the Commission	*Amendment*
Article 5	***supprimé***
Principe consistant à «ne pas causer de préjudice important» aux objectifs environnementaux	
1. L'application rationalisée du principe consistant à «ne pas causer de préjudice important» visé à l'article 33, paragraphe 2, point d), du règlement (UE, Euratom) 2024/2509, est facilitée par des orientations simples et uniques (ci-après les «orientations sur le principe consistant à "ne pas causer de préjudice important"»).	
2.	
Les orientations visées au paragraphe 1 énoncent des principes et critères généraux et, si nécessaire, des critères spécifiques au niveau des domaines	

d'action concernés.

Elles font notamment la distinction entre les domaines d'action ou activités qui sont toujours considérés comme étant conformes au principe consistant à «ne pas causer de préjudice important» et les domaines d'action ou activités qui sont considérés comme causant un préjudice important à un ou plusieurs objectifs environnementaux et qui ne peuvent donc pas être financés par le budget de l'Union.

Les orientations de la Commission tiennent compte de la nécessité d'atteindre les objectifs fixés pour les programmes ou instruments concernés conformément aux priorités stratégiques de l'Union, de la nécessité d'éviter les doubles emplois avec les exigences découlant de la législation existante de l'UE, des niveaux élevés de protection de la santé humaine et de l'environnement prévus par la législation existante de l'UE, de la charge administrative et déclarative pesant sur les autorités et les bénéficiaires et du principe de proportionnalité.

La proportionnalité est assurée notamment en tenant compte de la taille de l'activité, de ses incidences sur le climat et l'environnement et des caractéristiques territoriales des régions dans lesquelles elle se situe ou du fait qu'elle peut se situer dans un pays tiers.

3.

Les orientations visées au paragraphe 1 recensent également les cas dans lesquels l'application du principe consistant à «ne pas causer de préjudice important» peut ne pas être possible ou appropriée, tels que les situations de crise, y compris les urgences causées par des catastrophes naturelles, ou d'autres raisons d'intérêt public majeur.

À cet égard, il convient notamment de considérer qu'il n'est pas possible ou approprié d'appliquer le principe consistant à «ne pas causer de préjudice

important» dans le cas d'activités de défense et de sécurité.

Amendment 509
Dick Erixon

Proposal for a regulation
Article 5

Text proposed by the Commission	*Amendment*
Article 5	***deleted***
'Do no significant harm' to environmental objectives	
1. A streamlined application of the 'do no significant harm' principle as referred to in Article 33(2), point (d), of Regulation (EU, Euratom) 2024/2509, shall be facilitated by a single and simple guidance ('do no significant harm guidance').	
2.	
The guidance referred to in paragraph 1 shall set out general principles and criteria and, where necessary, specific criteria at the level of relevant policy areas.	
It shall distinguish, in particular, between policy areas or activities that are always deemed to be in line with the do no significant harm principle, and policy areas or activities that are considered to do significant harm to one or several environmental objectives and can therefore not be financed from the EU budget.	
The guidance by the Commission shall take into account the need to achieve the set objectives of the relevant programmes or instruments in line with the Union's policy priorities, the need to avoid duplication with requirements under existing EU legislation, the high levels of	

contexte OBTENU PAR

protection to human health and the environment provided by existing EU legislation, the administrative and reporting burden on authorities and beneficiaries, and the principle of proportionality.

Proportionality shall be ensured notably by taking into account the size of an activity, its climate and environmental impacts, and the territorial characteristics of the regions where the activities take place or the fact that they may take place in third countries.

3.

The guidance referred to in paragraph 1 shall also identify cases where the application of the do no significant harm principle may not be feasible or appropriate, such as crisis situations, including emergencies arising from natural catastrophes, or other reasons of overriding public interest.

In this respect, it shall notably be considered that it is not feasible or appropriate to apply the do no significant harm principle in relation to defence and security activities.

Proposal for a regulation
Article 5 – paragraph 1 a (new)

Text proposed by the Commission	*Amendment*
	1a. Where appropriate, the delegated acts referred to in the first paragraph shall also define carve-out criteria specifying the conditions under which the listed activity concerned shall nonetheless be considered compliant with the DNSH principle and shall specify that activities that are not included in the list shall be automatically deemed to comply with the DNSH principle. Activities that comply with the technical screening criteria established under Regulation (EU) 2020/852 shall be deemed compliant with the DNSH principle for the purposes of this Regulation. No additional DNSH assessment shall be required in relation to environmental aspects already covered by the Taxonomy framework. The Commission shall also establish a guidance to ensure the consistent verification and application of the DNSH principle.

Or. en

Amendment 526
Ciaran Mullooly, Joachim Streit

Proposal for a regulation
Article 5 – paragraph 1 a (new)

Text proposed by the Commission	*Amendment*
	1a. Support under the Common Agricultural Policy which is deemed to comply with the 'do no significant harm' principle pursuant to Article 3(3) of Regulation (EU) XX [CAP Regulation for 2028–2034] shall also be considered compliant for the purposes of this Regulation. No separate assessment, certificate or supporting report demonstrating compliance with that principle shall be required in respect of the same support. This shall be without prejudice to checks verifying compliance with the applicable farm stewardship conditions.

Or. en

Justification

The horizontal budget rules should expressly recognise the CAP's deemed compliance provision. Farmers should not have to demonstrate the same compliance twice or incur duplicate assessment costs. Checks on the relevant CAP conditions remain applicable.

Article 5 – paragraph 2 – subparagraph 3

Text proposed by the Commission	*Amendment*
The guidance ***by the Commission*** shall ***take into account the need to achieve the set objectives of the relevant programmes or instruments in line with the Union's policy priorities, the need to avoid duplication with*** requirements ***under existing EU legislation, the high levels of protection to human health and the environment provided by existing EU legislation, the administrative and reporting burden on authorities and beneficiaries, and the principle of proportionality***.	Guidance ***or other non-binding documents*** shall ***not establish or amend DNSH eligibility conditions, exclusions, assessment*** requirements***, exemptions or derogations***.

Or. en

Justification

The amendment clearly defines the matters to be governed by the Annex and prevents substantive conditions from being added through soft law. It also establishes proportionality and the reuse of information already available.

Amendment 546
Bogdan Rzońca

Proposal for a regulation
Article 5 – paragraph 2 – subparagraph 3

Text proposed by the Commission	*Amendment*
The guidance by the Commission shall take into account the need to achieve the set objectives of the relevant programmes or instruments in line with the Union's policy priorities, the need to avoid duplication with requirements under existing EU legislation, the high levels of protection to human health and the environment provided by existing EU legislation, the administrative and reporting burden on authorities and beneficiaries, and the principle of proportionality.	The guidance by the Commission shall take into account the need to achieve the set objectives of the relevant programmes or instruments in line with the Union's policy priorities, the need to avoid duplication with requirements under existing EU legislation, the high levels of protection to human health and the environment provided by existing EU legislation, the administrative and reporting burden on authorities and beneficiaries, and the principle of proportionality. ***The guidance shall take into account the limited usability of the 'do not significant harm' principle and the restrictive nature of this principle. It shall also take into account the need for a review of the 'do not significant harm' principle as established in Regulation (EU) 2020/852 to increase the usability of this principle.***

	Compliance with farm stewardship conditions laid down in applicable Union agricultural legislation shall be recognised for the purposes of DNSH verification insofar as those conditions address the environmental impacts concerned. No duplicative evidence shall be required.

Or. en

Amendment 567
Thomas Pellerin-Carlin, Jean-Marc Germain
on behalf of the S&D Group

Proposal for a regulation
Article 5 – paragraph 2 a (new)

Text proposed by the Commission	*Amendment*
	2a. By way of derogation from the provisions of this Article concerning the

verification of compliance with the DNSH principle, in exceptional and duly justified circumstances, where specific, credible and documented indications give rise to serious doubts as to whether a project, operation or activity supported by the Union budget may cause significant harm to the environment within the meaning of Article 33(2), point (d), of Regulation (EU, Euratom) 2024/2509, the Commission may initiate an ad hoc screening of its compliance with the DNSH principle. Such screening may be carried out irrespective of any presumption of compliance under paragraph 1, the guidance referred to in that paragraph, or any prior verification of compliance under paragraph 3a.

The Commission shall duly justify the initiation of the screening by identifying the specific grounds and environmental risks concerned. The screening shall be limited to those risks and shall rely, to the greatest extent possible, on information already available. Where necessary, the Commission may request the beneficiary, the Member State concerned or the relevant implementing entity to provide additional information strictly necessary and proportionate to address those doubts.

The Commission shall ensure that the screening does not lead to systematic reassessments or the imposition of additional general requirements beyond those provided for in this Regulation. The parties concerned shall be given the opportunity to submit observations before any adverse conclusion is reached.

Or. en

Amendment 568
Ruggero Razza, Carlo Fidanza

Proposal for a regulation
Article 5 – paragraph 2 a (new)

Text proposed by the Commission	*Amendment*
	2a. Activities that comply with the applicable technical screening criteria for substantial contribution and for do no significant harm laid down in the delegated acts adopted pursuant to Regulation (EU) 2020/852 shall be deemed compliant with the 'do no significant harm' principle for the purposes of this Regulation. No further do no significant harm assessment or equivalent verification shall be required for such activities.

Or. en

Amendment 569
Danuše Nerudová

Proposal for a regulation
Article 5 – paragraph 2 a (new)

Text proposed by the Commission	*Amendment*
	2a. The application of the 'do no significant harm' principle shall respect the principle of technological neutrality and shall not exclude activities relating to nuclear energy, including the construction, operation, modernisation and lifetime extension of nuclear installations, solely on the basis of the technology used.

Or. en

Amendment 570
Lucia Yar, Michal Wiezik

Proposal for a regulation
Article 5 – paragraph 3 – subparagraph 1

Text proposed by the Commission	*Amendment*
The guidance referred to in paragraph 1 shall also identify cases where the application of the do no significant harm principle may not be feasible or appropriate, such as crisis situations, including emergencies arising from natural catastrophes, ***or other reasons of overriding public interest***.	The guidance referred to in paragraph 1 shall also identify ***and define exceptional and time limited*** cases where the application of the do no significant harm principle may not be feasible or appropriate, such as ***in duly justified*** crisis situations, including emergencies arising from natural catastrophes, ***within the meaning of EU environmental law, provided that the invoked crisis situation relates to an activity identified in the guidance as referred to in paragraph 1. In the case of crises-related support for the agricultural sector, including payments financed under crises reserve mechanisms, the application of such exemptions shall be limited to beneficiaries who have, prior to the occurrence of the crisis, implemented appropriate risk management and climate adaptation measures, including participation in recognised risk management tools. Beneficiaries not meeting these requirements shall not be eligible for such support.***

Or. en

Justification

From a perspective of sound financial management, budgetary responsibility and accountability, the EU budget should prioritise preventive measures to reduce avoidable costs and improve cost-effectiveness.

Or. en

Amendment 580
Bert-Jan Ruissen

Proposal for a regulation
Article 5 – paragraph 3 – subparagraph 1 a (new)

Text proposed by the Commission	*Amendment*
	To assess the feasibility of the application of the 'do no significant harm' principle to activities financed by the Union budget, the Commission shall, at least, assess the effects of the application on the strategic autonomy of the Union. This assessment shall, at least, take into account:
	a) Food security and dependencies;
	b) Competitiveness;
	c) Critical raw materials;
	d) Energy security and dependencies;
	e) Digital sovereignty;
	f) Accessibility of pharmaceutical products;
	When an activity is deemed to be valuable for the strategic autonomy of the Union, it shall be considered inappropriate to apply the 'do no significant harm' principle to this activity.

Or. en

Amendment 581
Monika Hohlmeier

Proposal for a regulation
Article 5 – paragraph 3 – subparagraph 1 a (new)

Text proposed by the Commission	*Amendment*
	Prior to the adoption of the delegated act(s) and the guidance referred to in paragraph 1, or any substantial update there to, the Commission shall carry out appropriate, transparent consultations during its prepatory work, including at the expert level, and that those consultations be conducted in accordance with the principles laid down in the Interinstitutional Agreement of 13 April 2016 on Better Law-Making. In particular, to ensure equal participation in the preparation of delegated acts(s) and the guidance referred to in paragraph 1, the European Parliament and the Council shall receive all documents at the same time as Member State's experts and authorities. The European Parliament and the Council shall have access to meetings of Commission expert groups and related documents dealing with the preparation of delegated acts.
	The Parliament and Council may submit observations within 3 months. The Commission shall engage into adequate exchange with the two institutions, take due account of the views expressed, and shall justify the manner in which it has done so within 3 months.

Or. en

Céline Imart, Isabelle Le Callennec, Christophe Gomart, François-Xavier Bellamy, Nadine Morano, Brice Hortefeux

Proposal for a regulation
Article 5 – paragraph 3 – subparagraph 2 a (new)

Text proposed by the Commission	*Amendment*
	Les investissements nécessaires à la sécurité alimentaire, à la compétitivité des capacités productives de l'Union ou à la recherche et à l'innovation peuvent bénéficier des exemptions prévues au présent paragraphe, dans les conditions fixées par la réglementation sectorielle applicable.

Or. fr

Amendment 598
Niclas Herbst

Proposal for a regulation
Article 5 – paragraph 3 a (new)

Text proposed by the Commission	*Amendment*
	3a. The relevant sector-specific rules may specify whether compliance with the DNSH principle is to be verified at the level of the relevant work programme, call for proposals or tenders, at the level of the individual project or operation, or through a combination of those levels, taking into account the nature of the support concerned.
	Sector-specific rules may define the type of documentation necessary for verifying compliance, definitions or conditions necessary, including the application of the proportionality principle for the application of the exclusion list to the programmes and activities falling within their scope.
	Programmes, documents, financing decisions, work programmes, calls for proposals, calls for tenders or other acts or documents relating to the implementation of Union programmes and activities shall not introduce additional exclusions, eligibility conditions, assessment criteria or methodological requirements concerning the application of the 'do no significant harm' principle beyond those provided for in this Regulation.
	The relevant sector-specific rules may further identify activities, categories of activities or circumstances for which the application of that principle is not feasible or appropriate, while ensuring consistent application across Union programmes and activities.

Or. en

Amendment 599
Thomas Pellerin-Carlin
on behalf of the S&D Group

Proposal for a regulation
Article 5 – paragraph 3 a (new)

Text proposed by the Commission	*Amendment*
	3a. The relevant sector-specific rules may specify whether compliance with the DNSH principle is to be verified at the level of the individual project or operation, or at the level of the relevant call for proposals or tenders, or through a combination of those levels, as long as an adequate level of assurance, effectiveness and auditability in verifying compliance with the principles and criteria laid down in this Regulation can be ensured, taking into account the nature of the support concerned. Such rules shall not modify the substantive principles or criteria laid down in this Article and in the delegated acts and the Commission guidance referred to in paragraph 1.

Or. en

Amendment 600
Ruggero Razza, Carlo Fidanza

Proposal for a regulation
Article 5 – paragraph 3 a (new)

Text proposed by the Commission	*Amendment*
	3a. The application of the DNSH principle shall avoid duplication with existing Union legislation and existing assessments shall not be repeated. Compliance assessments already carried out under applicable Union environmental legislation, including Directive 2011/92/EU (EIA Directive), Directive 2010/75/EU (Industrial

Emissions Directive), Directive 2000/60/EC (Water Framework Directive) and Directives 92/43/EEC and 2009/147/EC (Nature Directives), shall be taken into account and shall not be duplicated for DNSH purposes where the relevant environmental aspects have already been assessed.

Ciaran Mullooly, Joachim Streit

Proposal for a regulation
Article 5 b (new)

Text proposed by the Commission	*Amendment*
	Article5b
	Member States shall ensure timely payment of support otherwise due despite

authority-related DNSH failures and bear related financial corrections without passing them, directly or indirectly, to beneficiaries not responsible.

Or. en

Justification

Authority errors should not delay farmers' payments or transfer financial corrections to them.

Amendment 613
Dick Erixon

Proposal for a regulation
Article 6

Text proposed by the Commission	*Amendment*
Article 6	***deleted***
Social policies	
1. The contribution from the budget to social policies within the Union shall be monitored by means of the budget expenditure tracking and performance framework laid down in Article 8, including by means of EU coefficients.	
2. Programmes and activities shall, where feasible and appropriate in accordance with the relevant sector-specific rules, be implemented to achieve their set objectives respecting working and employment conditions under applicable national law, Union law, ILO conventions and collective agreements in accordance with Article 33(2), point (e), of Regulation (EU, Euratom) 2024/2509.	

Or. en

Amendment 614
Jean-Marc Germain, Thomas Pellerin-Carlin
on behalf of the S&D Group

Proposal for a regulation
Article 6 – paragraph 1

Text proposed by the Commission	*Amendment*
1. The contribution from the budget to social policies within the Union shall be monitored by means of the budget expenditure tracking and performance framework laid down in Article 8, including by means of EU coefficients.	1. The contribution from the budget to social policies***, objectives and specific targets*** within the Union shall be monitored ***in a measurable manner*** by means of the budget expenditure tracking and performance framework laid down in Article 8, including by means of EU coefficients. ***This monitoring shall differentiate between social policies, objectives and specific targets, which fall within the scope of the Regulation (EU) XX [European Social Fund], and other social objectives and targets addressed through the European Fund for economic, social and territorial cohesion, agriculture and rural development, fisheries and maritime affairs, and prosperity and security.***

Or. en

Amendment 615
Lucia Yar, Michal Wiezik

Proposal for a regulation
Article 6 – paragraph 1

Text proposed by the Commission	*Amendment*
1. The contribution from the budget to social policies within the Union shall be monitored by means of the budget expenditure tracking and performance framework laid down in Article 8, including by means of EU coefficients.	1. The contribution from the budget to social policies within the Union shall be monitored by means of the budget expenditure tracking and performance framework laid down in Article 8, including by means of EU coefficients. ***Reporting under individual intervention fields shall distinguish between social policies, objectives and targets falling within the scope of Regulation (EU) XX [European Social Fund] and those addressed through other programmes.***

Or. en

Justification

The stronger link with the European Pillar of Social Rights is needed. An explicit reference to poverty reduction and social inclusion will support the thematic concentration of measures in the field of social inclusion. This also recalls the existing enabling conditions under the Common Provisions Regulation for 2021–2027, Annex IV, concerning the European Pillar of Social Rights.

Amendment 626
Victor Negrescu

Proposal for a regulation
Article 6 – paragraph 2 a (new)

Text proposed by the Commission	*Amendment*
	2a. Where employment creation or retention is an objective of a supported intervention, monitoring and evaluation shall assess, as appropriate, the sustainability and quality of the employment supported, including employment stability, access to training, occupational health and safety, and compliance with applicable working and

employment conditions. Aggregate employment figures shall be complemented, where relevant and available, by data disaggregated by sex, age and disability. Data collection shall rely primarily on existing administrative and statistical sources and shall comply with applicable personal data protection rules and the principle of proportionality.

Or. en

Amendment 627
Lucia Yar, Michal Wiezik

Proposal for a regulation
Article 6 – paragraph 2 a (new)

Text proposed by the Commission	*Amendment*
	2a. EU programmes and instruments shall contribute to strengthening society and the Union's social model, implementing the European Pillar of Social Rights and supporting a socially just transition based on strong environmental and labour standards, the creation of quality jobs, combating poverty and social exclusion, promoting people's well-being, combating discrimination including antigypsyism, and promoting the equality, inclusion and participation of Roma and other groups facing structural discrimination in Europe, with a view to promoting social justice and equality in accordance with the objectives of Article 3(3) TEU and Article 9 TFEU.

Or. en

Justification

The reference to combating antigypsyism reflects the EU Roma strategic framework for equality, inclusion and participation for 2020–2030 and the Council Recommendation on Roma equality, inclusion and participation, which recognise antigypsyism as a specific form of racism that continues to fuel social exclusion and inequality. Explicit support for Roma equality, inclusion and participation and for other groups facing structural discrimination

strengthens the social dimension of the MFF and ensures that EU funding contributes to removing persistent structural barriers.

Amendment 628
Stine Bosse, Gerben-Jan Gerbrandy

Jean-Marc Germain, Thomas Pellerin-Carlin
on behalf of the S&D Group

Proposal for a regulation
Article 6 – paragraph 2 b (new)

Text proposed by the Commission	*Amendment*
	2b. In addition to ensuring compliance with the Charter of Fundamental Rights and the rule of law, Member States shall demonstrate the existence of national or regional frameworks for active labour market policies, gender equality, education and training, Roma inclusion, person-centred health and long-term care, social economy, and social inclusion and poverty reduction, including child poverty and the shift from institutional to family- and community-based care.

Or. en

Amendment 635
Lucia Yar, Michal Wiezik

Proposal for a regulation
Article 6 – paragraph 2 b (new)

Text proposed by the Commission	*Amendment*
	2b. Where relevant, programmes and activities shall demonstrate compliance with international human rights treaties and conventions to which the Union is a party. Compliance with the Charter of Fundamental Rights of the European Union shall be demonstrated. No activity that is contrary to the obligations of the Union and Member States as parties to the United Nations Convention on the Rights of Persons with Disabilities shall be financed.

Or. en

Amendment 636
Jean-Marc Germain, Thomas Pellerin-Carlin
on behalf of the S&D Group

Proposal for a regulation
Article 6 – paragraph 2 c (new)

Text proposed by the Commission	*Amendment*
	2c. A stand-alone European Social Fund (ESF), operating outside the National Recovery and Resilience Plans (NRRPs), shall provide dedicated financial support, with the objective of promoting employment, social inclusion, and skills development. In addition, Member States shall ensure that, within their respective NRRPs, no less than 14% of allocated resources are directed towards social investment measures, outside of the scope of ESF. This dual structure, combining a distinct funding instrument with a mandatory allocation

within national plans, shall contribute to strengthening the effectiveness, monitoring, and performance of social policy interventions across the Union.

Or. en

Amendment 637
Stine Bosse, Gerben-Jan Gerbrandy

Proposal for a regulation
Article 6 – paragraph 2 c (new)

Text proposed by the Commission	*Amendment*
	2c. The social and employment guidance shall set out general principles, criteria and, where necessary, specific criteria at the level of relevant policy areas. It shall also include funding guidelines to ensure the compliance with the thematic concentrations referred to in Regulation (EU) XX [establishing the European Social Fund as part of the Fund set out in Regulation (EU) […] [NRP] and establishing conditions for the implementation of the Union support to quality employment, skills and social inclusion for the period from 2028 to 2034].

Or. en

Amendment 638
Lucia Yar, Michal Wiezik

Proposal for a regulation
Article 6 – paragraph 2 c (new)

Text proposed by the Commission	*Amendment*
	2c. Adequate financial support shall be allocated to programmes supporting persons facing social exclusion and discrimination, in line with the relevant specific indicators set out in Annex I to

this Regulation.

Or. en

Amendment 639
Lucia Yar, Michal Wiezik

Proposal for a regulation
Article 6 – paragraph 2 d (new)

Text proposed by the Commission	*Amendment*
	2d. In addition to ensuring compliance with the Charter of Fundamental Rights of the European Union and the rule of law, Member States shall demonstrate the existence of national or regional strategies or frameworks for developing the social economy, active labour market policies, gender equality, education and training, Roma inclusion, person-centred health and long-term care, social inclusion and poverty reduction, including child poverty, and the transition from institutional care to family- and community-based care.

Or. en

Justification

In addition to ensuring compliance with the Charter of Fundamental Rights and the rule of law, Member States should demonstrate the existence of national or regional strategies or frameworks supporting key social policy areas, including social economy, active labour market policies, gender equality, education and training, Roma inclusion, person-centred health and long-term care, social inclusion and poverty reduction, including child poverty, and the transition from institutional to family- and community-based care.

Amendment 640
Stine Bosse, Gerben-Jan Gerbrandy

Proposal for a regulation
Article 6 – paragraph 2 d (new)

Text proposed by the Commission	*Amendment*
	2d. Where there is insufficient progress towards the social and employment spending target, by an individual NRP Plan or the overall Fund, the Institutions, in accordance with their responsibilities and the relevant legislation, shall consult each other on appropriate measures to be taken to ensure that Union spending on social objectives is reached over the 2028-2034 multiannual financial framework.

Proposal for a regulation
Article 6 – paragraph 2 e (new)

Text proposed by the Commission	*Amendment*
	2e. Adequate financial support shall be allocated to programmes supporting persons facing social exclusion and discrimination, in line with the relevant specific indicators set out in Annex I to this Regulation.

Or. en

Amendment 642
Rasmus Nordqvist, Daniel Freund
on behalf of the Verts/ALE Group

Proposal for a regulation
Article 6 a (new)

Text proposed by the Commission	*Amendment*
	Article6a
	Social conditions for Union support

1. Union support shall be subject to conditions ensuring that, where such support contributes to the generation of economic value, a fair share of that value is retained, reinvested or returned in the public interest, and that such support promotes quality employment, social and workers' rights, in accordance with the Charter of Fundamental Rights of the European Union.

2. A streamlined application of the public return conditions referred to in this Article shall be facilitated by a single and simple guidance ("social guidance"). That guidance shall set out general principles and criteria and, where necessary, specific criteria for relevant policy areas, in accordance with paragraphs 3 to 8.

3. All obligations laid down in this Article shall apply from the granting of Union support and for a period of at least eight years thereafter, taking into account the nature, duration and risk profile of the supported activity.

4. Where Union support is granted to undertakings operating on a for-profit basis:

(a) where realised returns exceed the baseline projections approved at the time of award, a proportionate share of excess profits shall be entered in the Union budget in accordance with Article 212(3) of Regulation (EU, Euratom) 2024/2509;

(b) such returned amounts shall constitute internal assigned revenue within the meaning of Article 21(5) of Regulation (EU, Euratom) 2024/2509;

(c) detailed arrangements, including thresholds, calculation methodologies and modalities of return, shall be defined in the relevant funding agreements and in the guidance under paragraph 2.

5. Beneficiaries referred to in paragraph 4 shall, for the duration referred to in paragraph 3:

(a) prioritise the reinvestment of profits

generated with the support of Union funding into activities consistent with the objectives of the supported action;

(b) be subject to limitations on dividend distributions, share buybacks or equivalent forms of value extraction, where necessary to safeguard the public interest and the achievement of the action's objectives.

6. All beneficiaries shall:

(a) refrain from collective dismissals linked to the supported activity;

(b) respect applicable labour law, collective agreements and social dialogue mechanisms;

(c) ensure that Union support contributes to improving working conditions and strengthening collective bargaining.

7. Beneficiaries shall report annually on compliance with the obligations set out in this Article. The Commission shall establish proportionate monitoring requirements and ensure consistency with the performance framework under this Regulation.

8. Where the conditions set out in this Article are not complied with, the Commission shall take appropriate measures, including:

(a) the partial or full recovery of Union support;

(b) the suspension of payments;

(c) the exclusion from future Union funding, where justified.

Victor Negrescu

Proposal for a regulation
Article 6 a (new)

Text proposed by the Commission	*Amendment*
	Article 6a
	Social and affordable housing
	Over the 2028-2034 programming period, at least 10% of the Union financial allocation programmed for regional development and cohesion in each national and regional partnership plan shall contribute to the provision of social and affordable housing. Expenditure counted towards that target shall directly contribute to increasing the supply, accessibility or affordability of housing, including through construction, rehabilitation or conversion of existing buildings. The Commission shall report annually to the European Parliament and the Council on progress towards the target, including the amounts programmed, committed and paid in each Member State. Where progress is insufficient, the Member State concerned shall identify corrective measures in cooperation with the competent regional and local authorities.

Or. en

Amendment 644
Fabienne Keller

Proposal for a regulation
Article 6 a (new)

Text proposed by the Commission	*Amendment*
	Article6a
	EU Sovereignty
	1. Sector-specific rules may extend those

conditions to EEA and EFTA States, Ukraine or associated countries, subject to reciprocity and to the security interests of the Union. Exceptional, duly justified and time-limited derogations may be granted where no substitute is available in the Union. They shall be published on the Single Gateway, having due regard to security considerations.

2. In other sectors, the European preference shall be applied through eligibility, selection or award criteria.

3. This Article shall apply in compliance with the Union's international obligations, including the security exceptions provided therein.

Or. en

Justification

Union funds should not deepen strategic dependencies. This Article sets a horizontal European preference, binding in strategic sectors and aligned with the conditions agreed for SAFE (Regulation (EU) 2025/1106).

Amendment 645

Parliament and the Council on progress towards the target by Member State, distinguishing programmed amounts, commitments and payments, and separately identifying expenditure supporting artificial intelligence. Where progress is insufficient, Member States shall identify corrective measures in cooperation with the competent regional and local authorities.

Or. en

Amendment 647
Victor Negrescu

Proposal for a regulation
Article 6 d (new)

Text proposed by the Commission	*Amendment*
	Article 6d
	Education, training, skills and lifelong learning
	1. Over the 2028-2034 multiannual financial framework, at least 20% of the total commitment appropriations under that framework shall be allocated to education, training, skills and lifelong learning. The target shall be achieved collectively through contributions from the relevant Union programmes and plans.
	2. Expenditure contributing to the target shall support:
	(a) early childhood education and care, primary and secondary education, higher education, vocational education and training, apprenticeships, adult education, and formal, non-formal and informal learning;
	(b) lifelong learning, upskilling and reskilling, including digital, technical, basic and transversal skills, career guidance and the recognition and

.contexte OBTAINED BY OSTENU PAR

validation of skills and qualifications;

(c) learning mobility, educational exchanges, cross-border cooperation and partnerships between education and training providers;

(d) the initial education and continuing professional development of teachers, trainers and other education staff, and measures improving the quality and inclusiveness of education and training;

(e) the construction, renovation, modernisation, accessibility and equipment of education and training facilities, including schools, vocational training centres, universities, teaching laboratories and infrastructure directly supporting student participation, as well as digital infrastructure, connectivity, platforms and learning resources serving education and training.

3. The Commission shall establish a common and transparent methodology for tracking the contribution of expenditure across the relevant programmes and plans, using the framework laid down in Article 8. It shall report annually to the European Parliament and the Council on progress towards the target, broken down by programme and type of intervention, distinguishing allocations, commitments and payments.

4. Where progress towards the target is insufficient, the Commission shall identify corrective measures in cooperation with the authorities responsible for implementing the relevant programmes and plans.

Amendment 648
Isabel Benjumea Benjumea

Proposal for a regulation
Article 7

Text proposed by the Commission	*Amendment*
Artículo 7	***suprimido***
Igualdad de género	
1.	
En el anexo IV del presente Reglamento se relacionan los programas y las actividades con los que se pretende fomentar la igualdad de género conforme a lo dispuesto en el artículo 33, apartado 2, letra f) del Reglamento (UE, Euratom) 2024/2509.	
En todos los programas y actividades, se prestará especial atención a que las mesas de evaluación y los otros organismos consultivos, tales como consejos, grupos de expertos y comisiones de seguimiento, tengan en la medida de las posibilidades una composición paritaria de género.	
2.	
A los efectos de la metodología de integración de la perspectiva de género a que se refiere el artículo 33, apartado 2, letra f), del Reglamento (UE, Euratom) 2024/2509, las actividades del presupuesto se clasificarán en las siguientes categorías, con sus correspondientes puntuaciones en materia de igualdad de género:	
a) actividades con la igualdad de género como propósito principal («puntuación 2 en igualdad de género»);	
b) actividades con la igualdad de género como propósito importante y deliberado, pero no principal («puntuación 1 en igualdad de género»);	
c) actividades cuya aportación prevista a la igualdad de género es poco importante («puntuación 0 en igualdad de género»).	
Las actividades a las que se refiere el segundo párrafo se definirán con referencia al listado de ámbitos de intervención del anexo I.	

contexte OBTENU PAR · OBTAINED BY

3. La Comisión facilitará orientaciones técnicas acerca de la metodología a que se refiere el apartado 2 para establecer las categorías y las puntuaciones en materia de igualdad de género correspondientes, procurando la coherencia en el conjunto de programas.

4. La Comisión estará facultada para adoptar actos delegados con arreglo al artículo 20 a fin de modificar el anexo IV.

Proposal for a regulation
Article 7

Text proposed by the Commission	*Amendment*
Article 7	***supprimé***
Égalité de genre	
1.	
Les programmes et activités visant à soutenir l'égalité de genre conformément à l'article 33, paragraphe 2, point f), du règlement (UE, Euratom) 2024/2509 sont précisés à l'annexe IV du présent règlement.	
Tous les programmes et activités veillent en particulier à garantir, dans la mesure du possible, l'équilibre hommes-femmes dans les groupes d'évaluation et d'autres organes consultatifs pertinents tels que les conseils, les groupes d'experts et les comités de suivi.	
2.	
Aux fins de la méthode d'intégration de la dimension de genre visée à l'article 33, paragraphe 2, point f), du règlement (UE, Euratom) 2024/2509, les activités du budget relèvent de l'une des catégories suivantes et des notes correspondantes en	

matière d'égalité de genre:

a) les activités dont l'égalité de genre est l'objectif principal (ci-après «note de 2 en matière d'égalité de genre»);

b) les activités dont l'égalité de genre est un objectif important et délibéré, mais n'est pas l'objectif principal (ci-après «note de 1 en matière d'égalité de genre»);

c) les activités qui ne devraient pas contribuer de manière substantielle à l'égalité de genre (ci-après «note de 0 en matière d'égalité de genre»).

Les activités mentionnées au deuxième alinéa sont définies par référence à la liste des domaines d'intervention figurant à l'annexe I.

3. La Commission fournit des orientations techniques sur la méthode visée au paragraphe 2 aux fins de la détermination des catégories et des notes correspondantes en matière d'égalité de genre, dans le but d'assurer la cohérence entre l'ensemble des programmes.

4. La Commission est habilitée à adopter des actes délégués en vertu de l'article 20 pour modifier l'annexe IV.

Dick Erixon

Proposal for a regulation
Article 7

Text proposed by the Commission	*Amendment*
Article 7	***deleted***
Gender equality	
1.	
The programmes and activities that aim to support gender equality in accordance with Article 33(2), point (f), of Regulation	

(EU, Euratom) 2024/2509 are specified in Annex IV to this Regulation.

All programmes and activities shall pay particular attention to ensuring, to the extent possible, gender balance in evaluation panels and other relevant advisory bodies such as boards, expert groups and monitoring committees.

2.

For the purpose of the gender equality mainstreaming methodology referred to in Article 33(2), point (f), of Regulation (EU, Euratom) 2024/2509, activities of the budget shall fall into one of the following categories and corresponding gender equality scores:

(a) activities with gender equality as a principal objective ('gender equality score 2');

(b) activities with gender equality as an important and deliberate objective but not as its main objective ('gender equality score 1');

(c) activities anticipated to have no substantial contribution to gender equality ('gender equality score 0').

The activities referred to in the second subparagraph shall be defined by reference to the list of intervention fields set out in Annex I.

3. The Commission shall provide technical guidance on the methodology referred to in paragraph 2 to determine the categories and corresponding gender equality scores, aiming to ensure consistency across all programmes.

4. The Commission is empowered to adopt delegated acts in accordance with Article 20 to amend Annex IV.

Bert-Jan Ruissen

Proposal for a regulation
Article 7 – paragraph 2 – subparagraph 2 a (new)

Text proposed by the Commission	*Amendment*
	The Commission shall assess the value of activities for the strategic autonomy of the Union. In the assessment, the Commission shall, at least, take into account:
	a) food security and dependencies;
	b) competitiveness;
	c) critical raw materials;
	d) energy security and dependencies;
	e) digital sovereignty;
	f) pharmaceutical products;
	g) security and defence;
	When an activity is deemed to be valuable for the strategic autonomy of the Union, the Commission shall exclude this activity from the gender equality scores.

Or. en

Amendment 686
Rasmus Nordqvist, Daniel Freund
on behalf of the Verts/ALE Group

Proposal for a regulation
Article 7 – paragraph 3

Text proposed by the Commission	*Amendment*
3. The Commission shall provide technical guidance on the methodology referred to in paragraph 2 to determine the categories and corresponding gender equality scores, aiming to ensure consistency across all programmes.	3. The Commission***, with the support of the European Institute for Gender Equality, EIGE,*** shall provide technical guidance ***on 1 January 2027 in line with OECD standards*** on the methodology referred to in paragraph 2 to determine the categories and corresponding gender

equality scores ***and to define minimum criteria including gender equality objectives ex ante gender analysis, linked to the attribution for each gender equality score. It shall be also accompanied by a robust gender equality results framework to measure progress towards gender equality objectives and results***, aiming to ensure consistency across all programmes ***on the basis of the Roadmap for Women´s Rights further developed within the Gender Equality Strategy 2026-2030***.

Before 1 January 2027, the Commission shall submit an explanatory sheet outlining the main features of the methodology and the Member States shall be involved in developing the technical guidance in order to ensure it is effectively applied. EIGE shall support the Commission in the implementation of gender mainstreaming in the MFF, providing methodological support and capacity building for EU institutions and Member States, and promoting the sharing and adoption of best practices.

The Commission shall ensure adequate financing of EIGE to perform its role to its full extent. It shall be ensured that no funding is allocated to beneficiaries and organisations whose objectives, actions or programmes undermine gender equality, the values of the European Union and the rights deriving from Articles 2 and 3 TEU and which aim to reverse advances in women's rights, or weaken fundamental rights as set out in Articles 8 and 23 of the Charter.

Under the proposed Performance Regulation for the 2028–2034 Multiannual Financial Framework, gender equality shall remain fully integrated as a horizontal principle across EU budget programmes, with the objective to increase the Gender Equality performance result by at least 5 percentage points compared with the average result of the published annual data during the previous framework 2021-

.contexp OBTAINED BY CRITICAL

2027, while maintaining a continuous annual upward trajectory across programming periods.

Activities falling into the category of 'gender equality score 2', referred to in point (a) of paragraph 2 shall account for at least 5 percent of the overall expenditure of the entire 2028-2034 multiannual financial framework.

Activities with gender equality score 2 shall contribute 100 % to the gender equality target. Activities with gender equality score 1 shall contribute at least 40% to the gender equality target. Activities with gender equality score 0 and 0*shall contribute 0 % to the gender equality target.

Or. en

Amendment 687
Stine Bosse, Gerben-Jan Gerbrandy

	5. Programmes and activities shall in general be implemented with a view to strengthening the general economic competitiveness of the Union, in particular by supporting productivity growth, innovation, research and development, industrial capacity, the scaling-up of European businesses, and the creation of high-quality jobs. The application of this horizontal principle is to be ensured through the individual impact assessment of programmes and activities.

Or. en

Amendment 706
Isabel Benjumea Benjumea

Proposal for a regulation
Article 7 a (new)

Text proposed by the Commission	*Amendment*
	Article 7 bis
	Competitiveness mainstreaming check
	1. Los programas y actividades estarán sujetos a una evaluación de la integración transversal de la competitividad para determinar su contribución a objetivos importantes de la Unión, como el fortalecimiento del mercado único, la digitalización, el apoyo a las pymes y a los ecosistemas industriales, la eliminación de las conexiones pendientes en materia de conectividad, el fomento de la innovación y la investigación, la mejora de las capacidades y la productividad y la reducción de las dependencias estratégicas, incluida la seguridad alimentaria.
	2. Cuando sea viable y adecuado, de conformidad con las normas sectoriales pertinentes, la contribución del presupuesto a la integración transversal de la competitividad dentro de la Unión se supervisará mediante el marco de seguimiento del gasto presupuestario y del rendimiento establecido en el artículo 8, incluidos los coeficientes de la Unión.
	3. Los programas y actividades se ejecutarán con el objetivo de contribuir a los objetivos generales de competitividad de la Unión durante todo el marco financiero plurianual 2028-2034. Dichas contribuciones se calcularán utilizando el coeficiente más elevado de los correspondientes a la evaluación de la integración transversal de la competitividad del marco mencionado en el apartado2.
	4. A efectos del presente artículo, las actividades realizadas en el marco de las distintas intervenciones se planificarán y ejecutarán de manera coordinada, teniendo en cuenta las actuaciones relacionadas a escala de la Unión, con el fin de evitar duplicidades y maximizar su

contribución a la competitividad.

5. Con el fin de garantizar una aplicación armonizada de este principio, la Comisión prestará asistencia a los Estados miembros para determinar de qué manera las actuaciones comprendidas en intervenciones específicas pueden contribuir a mejorar la competitividad de la Unión y cómo garantizar las sinergias entre las distintas actividades e intervenciones.

6. Las actividades a que se refiere el presente artículo se definirán por referencia a la lista de campos de intervención establecida en el anexo I.

7. A más tardar el 30 de junio de 2031, la Comisión presentará al Parlamento Europeo y al Consejo un informe sobre los avances logrados en la integración transversal de la competitividad a escala de la Unión. Sobre la base de dicho informe, la Comisión podrá presentar, si fuera necesario, una propuesta para establecer un objetivo de gasto en competitividad para el período restante del marco financiero plurianual 2028-2034. El incumplimiento de dicho objetivo no tendrá repercusiones sobre la financiación asignada a las medidas o actividades.

Amendment 707
Bert-Jan Ruissen

Proposal for a regulation
Article 7 a (new)

Text proposed by the Commission	*Amendment*
	Article 7a
	Competitiveness
	1. The contribution from the budget to the competitiveness of the Union shall be monitored by means of the budget

expenditure tracking and performance framework laid down in Article 8, including by means of EU coefficients.

2. The Commission shall develop a methodology to assess the contribution of activities of the budget to the competitiveness of the Union. If an activity is deemed to have no significant contribution to the competitiveness of the Union, the Commission shall assess whether the activity has significant detrimental effects on the competitiveness of the Union. If the assessment finds significant detrimental effects, the activity shall not be eligible for funding.

3. The Commission shall provide technical guidance on the methodology referred to in paragraph 2, to ensure consistency across all programmes.

Amendment 717
Monika Hohlmeier

Proposal for a regulation
Article 8 – paragraph 1 – subparagraph 1 a (new)

Text proposed by the Commission	*Amendment*
	As part of the budget expenditure monitoring and to allow for transparency and traceability of EU funds, clear data should be recorded by the Commission as

regards final beneficiaries and final recipients, the exact sums received by final beneficiaries and recipients and for what operation.

Government ministries, agencies, public bodies or state-owned entities that oversee, regulate, or administer the funds should only be considered final recipients when they are themselves involved in the execution and direct application of the work or service and bear the associated costs;

The Commission will make this data available to the European Parliament for exercising democratic parliamentary scrutiny as one arm of the budgetary authority and as the sole discharge authority over the implementation of the European Union budget, assessing the legality, regularity and sound financial management of expenditure, safeguarding the Union's financial interests, and preparing Parliament's decisions on the discharge of the budget.

For the purposes of democratic scrutiny and as co-legislator the European Parliament, and all its Specialised Committees shall receive the respective information, within the remit of their competences.

Amendment 720
Ruggero Razza, Carlo Fidanza

Proposal for a regulation
Article 8 – paragraph 1 a (new)

Text proposed by the Commission	*Amendment*
	1a. The Commission shall ensure that the list of intervention fields set out in Annex I covers, to the greatest extent possible, activities supporting all policy objectives pursued under Union programmes and activities, including

activities in the field of external action and development cooperation and activities contributing to the climate-neutrality objective laid down in Regulation (EU) 2021/1119, as amended by Regulation (EU) 2026/667, in particular the manufacturing and deployment of net-zero technologies within the meaning of Regulation (EU) 2024/1735. The EU coefficients assigned in Annex I to intervention fields relating to the manufacturing and deployment of such net-zero technologies shall fully reflect their direct and indirect contribution to climate change mitigation. Where the Commission considers that policy objectives, including those relating to the enlargement process, pre-accession support or the strengthening of partnerships with third countries, are not adequately reflected in the intervention fields and indicators set out in Annex I, it shall set out the reasons therefor in the relevant annex to the annual report referred to in Article 9(2).

Or. en

Amendment 721
Dick Erixon

Proposal for a regulation
Article 8 – paragraph 1 a (new)

Text proposed by the Commission	*Amendment*
	1a. Each intervention field set out in Annex I shall be associated with at least one result indicator. Indicators that measure coverage or uptake, such as the share of recipients, holdings, area or population supported, are output indicators and shall not be used as result indicators. Where a meaningful result indicator cannot reasonably be defined for an intervention field, Annex I shall state the reasons and the expenditure under that field shall be reported on a cost

basis; that exception shall be reviewed in the evaluations referred to in Article 10. The Commission shall adopt, no later than 12 months after the entry into force of this Regulation, delegated acts in accordance with Article 20 amending Annex I to comply with this paragraph.

Or. en

Amendment 722
Dick Erixon, Bert-Jan Ruissen

Proposal for a regulation
Article 8 – paragraph 1 b (new)

Text proposed by the Commission	*Amendment*
	1b. The Commission shall explicitly link each intervention field set out in Annex I to the specific objective or objectives of each programme that the intervention field is intended to support, so as to ensure a clear and verifiable correlation between expenditure and the objectives of that programme. For each programme, the Commission shall present the expenditure under each intervention field against the specific objective or objectives it supports and, where data are available, the cost per measurable result achieved, in the programme performance dataset published on the Single Gateway.

Or. en

Justification

Annex I lists intervention fields but not the programme objectives they serve, so spending cannot be correlated with objectives and value for money cannot be judged programme by programme. The Commission, which holds this mapping, is required to state the link for every programme and to show expenditure and, where data exist, the cost per result against each objective.

Proposal for a regulation
Article 8 – paragraph 4

Text proposed by the Commission	*Amendment*
4. The Commission is empowered to adopt delegated acts in accordance with Article 20 to amend Annex I and Annex II.	4. The Commission is empowered to adopt delegated acts in accordance with Article 20 to amend Annex I and Annex II ***limited to the following purposes, each delegate act shall be limited to one of these purposes:***
	(a) to reflect legislative changes to an existing Union programme or activity after the entry into force of this Regulation;
	(b) to reflect the establishment of a new Union programme or activity by a legislative act adopted after the entry into force of this Regulation;
	(c) where no result indicator has been assigned for a given intervention field and the Commission considers it relevant, to add at least one quantitative result indicator for that intervention field.
	As regards point (c) of the first subparagraph, the Commission shall, by … [two years after the entry into force of this Regulation], adopt a delegated act in accordance with Article 20 to amend Annex I. Where the Commission

.contexte OBTAINED BY THE PAR

considers that a quantitative result indicator cannot be formulated for a given intervention field, it shall instead define a qualitative result indicator describing the expected change in policy, legal, institutional or administrative conditions that the intervention field is designed to achieve, against which progress can be assessed during and at the end of the implementation period.

Or. en

Justification

This amendment aims to limit the purposes for which the COM might adopt delegated acts in accordance with Article 20 to amend Annex I and Annex II.

Amendment 747
Georgios Aftias

Proposal for a regulation
Article 8 – paragraph 4

Text proposed by the Commission	*Amendment*
4. The Commission is empowered to adopt delegated acts in accordance with Article 20 to amend Annex I and Annex II.	4. The Commission is empowered to adopt delegated acts in accordance with Article 20 to amend Annex I and Annex II. ***Safeguards shall apply to maintain the stability of Annexes I-II of this Regulation for the following purposes:***
	(a) to reflect legislative changes to an existing Union programme or activity after the entry into force of this Regulation;
	(b) to reflect the establishment of a new Union programme or activity by a legislative act adopted after the entry into force of this Regulation;
	(c) where no result indicator has been assigned for a given intervention field and the Commission considers it relevant, to add at least one quantitative result indicator for that intervention field, to reflect any other obvious omission in the list of intervention fields and/or

output/result indicators.

Or. en

Amendment 748
Jana Nagyová, Klara Dostalova, Ondřej Knotek, Jaroslav Bžoch, Tomáš Kubín, Jaroslava Pokorná Jermanová, Kateřina Konečná

Proposal for a regulation
Article 8 – paragraph 4

Text proposed by the Commission	*Amendment*
4. The Commission is empowered to adopt delegated acts in accordance with Article 20 to amend Annex I ***and*** Annex II.	4. The Commission is empowered to adopt delegated acts in accordance with Article 20 to amend Annex I ***by adding new intervention fields or new performance indicators in order to adapt it to changes occuring to programmes and activities financed by the budget and taking into account the methodological clarifications referred to in paragraph 3 [of this Article]. The Commission is empowered to adopt delegated acts in accordance with Article 20 to add new codes for the territorial dimension to the list set out in*** Annex II ***in order to adapt it to changes occuring to programmes and activities financed by the budget***.

Or. en

Justification

Retroactive changes to Annex I are in principle inconsistent with the performance-based approach. From a data-collection perspective, the system for calculating indicator values must also be established in advance.Amendments to Annexes I and II should therefore be limited and should not retroactively affect systems already in place.

Amendment 756
Jean-Marc Germain, Thomas Pellerin-Carlin
on behalf of the S&D Group

Proposal for a regulation
Article 8 a (new)

Text proposed by the Commission	*Amendment*
	Article8a
	Consultation mechanism
	1. The Commission shall establish a permanent consultation mechanism with all relevant stakeholders for the ongoing monitoring of the adequacy of the performance framework established under Article 8, including Member States' and local and regional authorities, social partners, civil society organisations, final recipients and beneficiaries, and implementing partners.

2.The consultation mechanism referred to in paragraph 1 shall in particular include:

(a) a structural review of the performance framework four years after the date of application of this Regulation, covering the coherence, completeness and proportionality of Annex I, with particular attention to:

(b) intervention fields lacking result indicators and to the adequacy of indicators for Union support, including financial instruments and budgetary guarantees;

(c) an assessment of the administrative requirements generated by the performance framework, disaggregated by type of stakeholder, covering at minimum: the Commission, Member States' and local and regional authorities, implementing partners, and project promoters and final beneficiaries and recipients.

3.The results of the reviews referred to in paragraph 2 shall be made publicly available and shall inform, where appropriate, the exercise of the delegated powers conferred on the Commission under Article 20 to amend Annex I.

4. Where the assessment referred to in paragraph 2(b) concludes that the administrative requirements is disproportionate relative to the policy objectives pursued, the Commission shall either propose amendments to Annex I to reduce that burden or publish a reasoned explanation of why it considers the existing framework to remain proportionate. The Commission shall transmit that reasoned explanation to the Parliament and to the Council.

Or. en

Amendment 757
Georgios Aftias

Proposal for a regulation
Article 8 a (new)

Text proposed by the Commission	*Amendment*
	Article8a
	Consultation Mechanism
	The Commission may establish a permanent consultation mechanism with relevant stakeholders, including Member States, local and regional authorities, final recipients, beneficiaries and implementing partners, for the ongoing monitoring of the adequacy of the performance framework established under Article 8. Such a mechanism shall apply exclusively to programmes under direct and indirect management. For programmes under shared management, the partnership principle shall be implemented by the Member States in accordance with their respective institutional and legal frameworks. In the case of the NRPP, stakeholder consultation and monitoring shall be carried out through the relevant Monitoring Committees.

Amendment 777
Anouk Van Brug, Joachim Streit

Proposal for a regulation
Article 9 – paragraph 2

Text proposed by the Commission	*Amendment*
2. The Commission shall inform annually the European Parliament and the Council on the level of implementation of the programmes and activities, as well as the progress made towards the achievement of programme objectives, in accordance with Article 41(3), first subparagraph, point (h) and Article 253(1), point (e), of Regulation (EU, Euratom) 2024/2509.	2. The Commission shall inform annually the European Parliament and the Council on the level of implementation of the programmes and activities, as well as the progress made towards the achievement of programme objectives, in accordance with Article 41(3), first subparagraph, point (h) and Article 253(1), point (e), of Regulation (EU, Euratom) 2024/2509. ***That information shall include, per programme, the results achieved against the result indicators, cost-effectiveness and the administrative burden for recipients.***

Or. en

Justification

Performance budgeting requires reporting on results and value for money, not only on outputs and spending. The Commission has committed to reducing administrative burden by at least 25% for all companies and 35% for SMEs, and this Regulation aims at a reduction of at least 25% for recipients. Including results, cost-effectiveness and administrative burden per programme in the existing annual reporting makes those commitments verifiable.

Amendment 778

Amendment 804
Victor Negrescu

Proposal for a regulation
Article 10 – paragraph 1 a (new)

Text proposed by the Commission	*Amendment*
	1a. In relation to the common

agricultural policy, the evaluations referred to in paragraph 1 shall assess the contribution of Union support to the stability of farmers' incomes, the economic viability and resilience of agricultural holdings, generational renewal and farmers' position in the food supply chain. They shall examine the distribution and effects of support across farm sizes and territories, with particular attention to small farms, young farmers and new entrants, and areas facing natural or other specific constraints. The evaluations shall also assess progress towards external convergence of area-based income support between Member States, in particular the reduction of differences in average support per eligible hectare in Member States below the Union average. They shall use a transparent and comparable methodology, distinguish Union support from national co-financing and assess the implications of persistent disparities for fair competition and the equitable treatment of farmers. That assessment shall be without prejudice to the allocation and payment rules laid down in the relevant sector-specific legislation. The evaluations shall distinguish, to the extent possible, the effects of supported interventions from those of market developments, extreme weather events and other external shocks. They shall make use of existing administrative and statistical data and, where necessary, proportionate representative surveys.

Or. en

Amendment 805
Dick Erixon, Bert-Jan Ruissen

Proposal for a regulation
Article 10 – paragraph 1 a (new)

Text proposed by the Commission	*Amendment*
	1a. The Commission shall define the minimum data requirements necessary to enable a systematic and consistent assessment of Union added value across programmes and activities. The assessment of Union added value may take into account the differing circumstances of Member States, provided that it remains systematic, consistent and comparable.

Amendment 833
Jana Nagyová, Klara Dostalova, Ondřej Knotek, Jaroslav Bžoch, Tomáš Kubín, Jaroslava Pokorná Jermanová, Kateřina Konečná

Proposal for a regulation
Article 11 – paragraph 2

Text proposed by the Commission	*Amendment*
2. Member States shall carry out evaluations to assess the impact of measures implemented in shared management by means of quantitative techniques, including counterfactual approaches and findings from experimental design***, where appropriate, at the latest two years after the end of the***	2. Member States shall carry out evaluations to assess the impact of ***the most relevant*** measures implemented in shared management ***at the latest two three years after the end of the programming period. These evaluations may be carried out*** by means of quantitative ***and qualitative*** techniques, including***, where appropriate,*** counterfactual approaches and

programming period.	findings from experimental design.

Or. en

Justification

Regarding the scope of the evaluation, given the scale and complexity of the plan, it would not be feasible to assess every individual measure in detail, as these may number in the hundreds. The evaluation should therefore focus on the most relevant and strategic parts of the plan. This will ensure a balanced and representative assessment while avoiding a disproportionate administrative burden.Regarding the evaluation timeframe, it is proposed to allow three to four years after the end of the programming period, instead of the current two years. A longer interval is needed to observe the real impact or at least tangible results of interventions. Two years is insufficient, particularly for areas such as research and innovation, where outcomes typically materialise over a longer horizon. In previous periods, projects were often completed very late, so that by the two-year point only final closures had been achieved, leaving no meaningful results to assess. Extending the timeframe would enable evaluations to capture genuine effects and provide more robust evidence of the impact of the measures.

Amendment 834
Thomas Pellerin-Carlin, Jean-Marc Germain
on behalf of the S&D Group

Amendment 836
Jana Nagyová, Klara Dostalova, Ondřej Knotek, Jaroslav Bžoch, Tomáš Kubín, Jaroslava Pokorná Jermanová, Kateřina Konečná

Proposal for a regulation
Article 11 – paragraph 3

Text proposed by the Commission	*Amendment*
3. Member States shall carry out at least one interim evaluation covering the ***entirety*** of their plans no later than three years after ***the start of*** their ***implementation***.	3. Member States shall carry out at least one interim evaluation covering the ***key parts*** of their plans ***at an appropriate stage of implementation*** no later than three years after their ***approval or, in any event, ahead of the mid-term review of the plans as set out in Article 25 of Regulation …/… [National and Regional Partnership Plans], which shall take that evaluation into account***.

Or. en

Justification

Regarding the scope and timing of the interim evaluation, given the complexity and scale of the plans, it would not be feasible to assess every individual measure in detail. The evaluation should therefore focus on the most relevant and strategic parts of the plans, ensuring a balanced and representative assessment without imposing a disproportionate administrative burden.It is requested that the timeframe for the interim evaluation not be specified. After the initial three-year period, implementation would still be at an early stage, leaving limited scope for a meaningful evaluation. Allowing flexibility on the timing, or extending the deadline, would ensure that sufficient progress has been made and enable a more substantive and informative interim evaluation.This approach is consistent with the amendment to the

NRPP Regulation, in particular Article 25(2), which extends the deadline for submitting the mid-term review, and Article 25(1)(c). If the deadline for the mid-term review is not extended accordingly, it would be unrealistic to require a completed comprehensive interim evaluation as an input to that review.The clarification of the start of the period is welcomed as an improvement compared to the original Commission proposal. Alternatively, the article could be deleted, as the interim evaluation could be organised at national level, with a scope and timing that ensure its effective use for decision-making.

Amendment 837
Bert-Jan Ruissen

Amendment 842
Jana Nagyová, Klara Dostalova, Ondřej Knotek, Jaroslav Bžoch, Tomáš Kubín, Jaroslava Pokorná Jermanová, Kateřina Konečná

Proposal for a regulation
Article 11 – paragraph 4

Text proposed by the Commission	*Amendment*
4. Member States shall draw up an evaluation roadmap and shall submit it to the relevant monitoring committee and the	4. Member States***, in accordance with their institutional and legal framework, including their relevant managing***

Commission no later than one year after the approval of their plans.	***authorities,*** shall draw up an evaluation roadmap and shall submit it to the relevant monitoring committee ***or body*** and the Commission no later than one year after the approval of their plans. ***The evaluation roadmap may also specify whether the interim evaluation referred to in paragraph 3 is to be broken down by multiple evaluations, such as by Chapters.***

Or. en

Justification

It is important to broaden the options for approving the evaluation roadmap. Approval should not be limited to monitoring committees, as the NRPP Regulation now also provides for the involvement of a coordination body and its committee.Where a Member State has a single evaluation roadmap, or a roadmap at the level of the coordination body, it should be clear where the roadmap is to be submitted and who is responsible for approving it. In such cases, it would be more logical and efficient for the coordination committee to approve the roadmap rather than multiple monitoring committees. This would ensure clarity, avoid duplication and align with the governance structure introduced by the NRPP Regulation.At the same time, approval by monitoring committees should remain possible, as it will remain relevant in certain cases.

Proposal for a regulation
Article 11 a (new)

Text proposed by the Commission	*Amendment*
	Article 11a
	Quality, reliability and assurance of performance data provided by Member States and implementing partners
	1. Member States and implementing partners shall ensure the timely availability of accurate, complete, reliable, and verifiable performance data to enable robust evaluations of Union programmes and activities and the assessment of progress towards the achievement of their objectives. The performance data shall be collected in accordance with the definitions, methodologies, and reporting requirements established by the Commission pursuant to Article 8(4).

.contexte OBTAINED BY · OBTENU PAR

2. The systems set up by Member States in accordance with Article 14(1) shall: (a) enable the systematic collection of data on output and result indicators; (b) ensure quality and consistency of the performance data; (c) include audit trails and supporting documentation allowing verification of reported data by the Commission, the ECA, the European Anti-Fraud Office (OLAF) and the European Public Prosecutor's Office (EPPO), where applicable; (d) ensure that data are available throughout implementation and at the time of the evaluations in accordance with Article 10(1).

3. When implementing the Union budget under shared management, Member States shall submit to the Commission, together with their annual performance data, a management declaration certifying that the reported data are accurate, complete and compliant with the applicable monitoring and reporting requirements. Where Member States are unable to provide such certification in respect of all or part of the reported data, they shall clearly identify the data concerned, provide the reasons for such limitation, and set out the corrective measures to address them and the timeline for doing so.

4. The Commission shall put in place appropriate control, audit and data validation arrangements with the Member States, including clear responsibilities for data quality, timely corrections of identified deficiencies and effective follow-up of audit findings, to ensure the traceability and reliability of performance data as well as the consistent application of the reporting methodology and the uniform interpretation of indicators.

5. To ensure the quality, reliability and comparability of performance data used for Union-level monitoring and evaluation, the Commission shall carry out risk-based verifications of

performance data submitted by Member States, implementing partners and other reporting entities before incorporating such data into the annual report referred to in Article 9(2). The Commission shall establish, document and make publicly available its verification methodology.

6. Where the Commission, based on its verifications pursuant to paragraph 5, has reasonable grounds to doubt the accuracy, completeness or reliability of reported performance data, it shall inform the Member State, implementing partner and other reporting entities concerned and, where such data affect a material portion of reported performance, the discharge authority without delay.

7. Pending the verification of the data referred to in paragraph 5, the Commission shall either exclude the data concerned from the annual report referred to in Article 9(2) or include the data with a clear indication that their reliability has not been fully assured, together with an explanation of the nature and extent of the uncertainty.

8. The Commission shall report annually to the discharge authority on the quality, reliability and coverage of performance data, including identified weaknesses, corrective actions taken and remaining risks.

	6a. The Commission shall make available to Member States a test version of the Single Gateway by 1 January 2027.

Or. en

Justification

Making a test version of the Single Gateway available as soon as possible is essential for the timely configuration and testing of its interface with national systems.

Amendment 905
Julien Sanchez, Angéline Furet, Virginie Joron

Proposal for a regulation
Article 13

Text proposed by the Commission	*Amendment*
Article 13	***supprimé***
Mise en œuvre dans le cadre des plans des États membres ou des pays tiers — principe consistant à «ne pas causer de préjudice important» et principe d'égalité de genre	
1. Chaque État membre ou pays tiers fournit une évaluation du respect du principe consistant à «ne pas causer de préjudice important» pour chaque activité prévue dans ses plans conformément aux orientations visées à l'article 5, sauf s'il en est exempté par les mêmes orientations.	
2. Par dérogation au paragraphe 1, dans le cas d'une activité pour laquelle l'application du principe consistant à «ne pas causer de préjudice important» peut ne pas être possible ou appropriée, chaque État membre ou pays tiers fournit une justification conformément aux orientations visées à l'article 5.	
3.	
Chaque État membre ou pays tiers fournit une évaluation du respect du principe d'égalité de genre pour chaque activité prévue dans ses plans en:	
a) expliquant de quelle manière les activités prévues dans les plans devraient contribuer à l'égalité de genre;	
b) attribuant à chaque activité la note appropriée en matière d'égalité de genre parmi celles indiquées à l'article 7, paragraphe 2, et en fournissant une justification adéquate.	
En outre, l'égalité de genre fait partie des critères utilisés pour évaluer les propositions, lorsque cela est possible et	

contexte OBTAINED BY · OBTENU PAR

approprié.

4. L'évaluation visée aux paragraphes 1 à 3 est fournie au moment de la présentation des plans. S'il n'est pas possible de fournir une évaluation du respect du principe d'égalité de genre à ce moment-là, l'activité est réputée ne pas contribuer de manière substantielle à l'égalité de genre et se voit ainsi attribuer la note de 0. L'État membre ou le pays tiers concerné peut revoir cette note chaque fois qu'il présente une modification de ses plans.

5. Le respect des obligations visées aux paragraphes 1 à 3 du présent article pour chaque plan ou modification présenté(e) par un État membre ou un pays tiers fait l'objet d'une évaluation conformément à la réglementation sectorielle applicable.

Or. fr

Amendment 906
Bogdan Rzońca

Proposal for a regulation
Article 13

Text proposed by the Commission	*Amendment*
Article 13	***deleted***
Implementation through plans by Member States or third countries – do no significant harm and gender equality	
1. Each Member State or third country shall provide a 'do no significant harm' assessment for each activity in their plans in accordance with the guidance referred to in Article 5, except where otherwise exempted by the same guidance.	
2. By derogation from the first paragraph, in case of an activity where the application of the 'do no significant harm' principle may not be feasible or	

appropriate, each Member State or third country shall provide a justification in line with the guidance referred to in Article 5.

3.

Each Member State or third country shall provide a gender equality assessment for each activity in their plans as follows:

(a) providing an explanation of how the activities in the plans are expected to contribute to gender equality;

(b) assigning to each activity the appropriate gender score from those set out in Article 7(2) and providing adequate justification.

Moreover, gender equality shall be included among the criteria used for the evaluation of proposals, where feasible and appropriate.

4. The assessment referred to in paragraphs 1 to 3 shall be provided at the moment of the submission of the plans. If it is not possible to provide a gender equality assessment at that moment, the activity shall be deemed to have no substantial contribution to gender equality and therefore be assigned a score 0. The Member State or third country concerned may revise that score whenever they submit an amendment of their plans.

5. The compliance with the obligations referred to in paragraphs 1 to 3 of this Regulation of each plan or amendment submitted by a Member State or a third country shall be subject to an assessment in accordance with the relevant sector-specific rules.

Amendment 920
Monika Hohlmeier

Proposal for a regulation
Article 13 – paragraph 1

Text proposed by the Commission	*Amendment*
1. Each Member State or third country shall provide a ‘do no significant harm’ assessment for each activity in their plans in accordance with ***the guidance referred to in*** Article 5, except where otherwise exempted ***by the same guidance***.	1. Each Member State or third country shall provide a ‘do no significant harm’ assessment for each activity in their plans in accordance with Article 5, except where otherwise exempted.

Or. en

Amendment 921
Jana Nagyová, Klara Dostalova, Ondřej Knotek, Jaroslav Bžoch, Tomáš Kubín, Jaroslava Pokorná Jermanová, Kateřina Konečná

Proposal for a regulation
Article 13 – paragraph 1

Text proposed by the Commission	*Amendment*
1. Each Member State or third country	1. Each Member State or third country

shall provide a ‘do no significant harm’ assessment for each activity in their plans in accordance with ***the guidance referred to in*** Article 5, except where ***otherwise exempted by the same guidance***.	shall provide a ‘do no significant harm’ assessment for each activity in their plans in accordance with Article 5 ***and Annex V(a)***, except where ***an assessment is not required under that Annex***.

Or. en

Justification

Necessary consequential amendment: both the assessment obligation and exemptions from it must derive from the Regulation and its Annex, not from guidance.

Amendment 922
Rasmus Nordqvist, Daniel Freund
on behalf of the Verts/ALE Group

Proposal for a regulation
Article 13 – paragraph 1 a (new)

Text proposed by the Commission	*Amendment*
	1a. If there are substantial changes in circumstances as regards the assessment provided in paragraph 1, in particular leading to non-compliance the Member State or third country shall update its assessment and amend the plan accordingly as appropriate following the procedures set out in sector specific regulations. The results of Strategic Environmental Impact Assessments pursuant to Directive [2001/42/EC] that are not in line with the assessment provided under paragraph 1 shall automatically be considered substantial changes in circumstances. Each Member State or third country shall also provide a climate resilience assessment for each activity where required according to Article 5a and in their plans in accordance with it.

Or. en

Amendment 923
Ruggero Razza, Carlo Fidanza

Proposal for a regulation
Article 13 – paragraph 1 a (new)

Text proposed by the Commission	*Amendment*
	1a. Where an activity complies with the technical screening criteria established under Regulation (EU) 2020/852, such compliance shall be considered sufficient evidence of compliance with the do no significant harm principle for the purposes of the assessment referred to in this Article.

Or. en

Or. en

Amendment 950
Rasmus Nordqvist, Daniel Freund
on behalf of the Verts/ALE Group

Proposal for a regulation
Article 13 – paragraph 4

Text proposed by the Commission	*Amendment*
4. The assessment referred to in paragraphs 1 to 3 shall be provided at the moment of the submission of the plans. If it is not possible to provide a gender equality assessment at that moment, the activity shall be deemed to have no substantial contribution to gender equality and therefore be assigned a score 0. The Member State or third country concerned may revise that score whenever they submit an amendment of their plans.	4. The assessment referred to in paragraphs 1 to 3 shall be provided ***and made public and available on the Transparency Portal referred to in Art 12*** at the moment of the submission of the plans. If it is not possible to provide a gender equality assessment at that moment, the activity shall be deemed to have no substantial contribution to gender equality and therefore be assigned a score 0. The Member State or third country concerned may revise that score whenever they submit an amendment of their plans.

Or. en

Amendment 951
Jana Nagyová, Klara Dostalova, Ondřej Knotek, Jaroslav Bžoch, Tomáš Kubín, Jaroslava Pokorná Jermanová, Kateřina Konečná

Proposal for a regulation
Article 13 – paragraph 4

Text proposed by the Commission	*Amendment*
4. The assessment referred to in paragraphs 1 to 3 shall be provided at the moment of the submission of the plans. If it is not possible to provide a gender equality assessment at that moment***, the activity*** shall be deemed to have no substantial contribution to gender equality and therefore be assigned a score 0. The Member State or third country concerned ***may*** revise that score whenever they submit an amendment of their plans.	4. The assessment referred to in paragraphs 1 to 3 shall be provided at the moment of the submission of the plans. If it is not possible to provide a gender equality assessment at that moment ***because of duly justified reasons, the measure*** shall be deemed to have no substantial contribution to gender equality and therefore be assigned a score 0. The Member State or third country concerned ***shall*** revise ***or confirm*** that score ***0*** whenever they submit an amendment of their plans.

Or. en

Justification

It is important to clarify that a gender score of 0 may constitute an appropriate and proportionate outcome in justified cases, particularly for activities with no meaningful gender dimension. This would avoid placing an unnecessary burden on Member States while preserving the integrity and consistency of the scoring methodology.Referring this clarification to the Commission's guidance would ensure a harmonised interpretation without imposing excessive administrative requirements.

Amendment 952
Monika Hohlmeier

Proposal for a regulation
Article 13 – paragraph 5

Text proposed by the Commission	*Amendment*
5. Article 14 – paragraph 2 – subparagraph 1 – point a

Text proposed by the Commission	*Amendment*
(a) one output indicator defining the final milestone or target for that measure and selected from Annex I corresponding either to the assigned intervention field or, where appropriate, to a different intervention field, or in duly justified cases and in agreement with the Commission an output indicator not included in Annex I;	(a) one output indicator defining the final milestone or target for that measure and selected from Annex I corresponding either to the assigned intervention field or, where appropriate, to a different intervention field, or in duly justified cases and in agreement with the Commission an output indicator not included in Annex I; ***in duly justified cases and where the nature of the measure cannot be adequately captured by any of the output indicators in Annex I, another output indicator not included in Annex I may be assigned***

Or. en

Amendment 964
Jana Nagyová, Klara Dostalova, Ondřej Knotek, Jaroslav Bžoch, Tomáš Kubín, Jaroslava Pokorná Jermanová, Kateřina Konečná

Proposal for a regulation
Article 14 – paragraph 2 – subparagraph 1 – point a

Text proposed by the Commission	*Amendment*
(a) one output indicator defining the final milestone or target for that measure and selected from Annex I corresponding either to the assigned intervention field or, where appropriate, to a different intervention field***, or in duly justified cases and in agreement with the Commission an output indicator not included in Annex I;***	(a) one output indicator defining the final milestone ***(suitable only for reforms)*** or target for ***each intervention field of*** that measure and selected from Annex I corresponding either to the assigned intervention field or, where appropriate, to a different intervention field**.**

Or. en

Justification

The provision that output indicators used as final milestones for reforms should be qualitative could also be reflected in the wording of Article 14. As currently drafted, the article appears to apply this concept only to reforms, suggesting that reforms would use the output indicators set out in Annex I while focusing on the achievement of qualitative change.To ensure a consistent interpretation, it would be useful to clarify whether the use of final milestones is limited to reforms, either in the Regulation itself or, at a minimum, in the forthcoming guidance on indicators.

Amendment 965
Stine Bosse, Gerben-Jan Gerbrandy

Proposal for a regulation
Article 14 – paragraph 2 – subparagraph 1 – point a

Text proposed by the Commission	*Amendment*
(a) one output ***indicator*** defining the final milestone or target for that measure and selected from Annex I corresponding either to the assigned intervention field or, where appropriate, to a different intervention field, or in duly justified cases and in agreement with the Commission an	(a) one ***or more*** output ***indicators*** defining the final milestone or target for that measure and selected from Annex I corresponding either to the assigned intervention field or, where appropriate, to a different intervention field, or in duly justified cases and in agreement with the

output indicator not included in Annex I;	Commission an output indicator not included in Annex I;

Amendment 987
Victor Negrescu

Proposal for a regulation
Article 14 – paragraph 4 a (new)

Text proposed by the Commission	*Amendment*
	4a. Where information at NUTS 2 level does not adequately reflect the territorial effects of a measure, Member States shall, where relevant and available, complement that information with data at NUTS 3 or local administrative unit level, or with the relevant territorial classifications set out in Annex II. Such information shall enable the identification of disparities between urban and rural areas and of specific disadvantages affecting remote, mountain, island, border and depopulating areas. It shall be derived primarily from existing administrative and statistical sources and shall be proportionate to the scale and territorial scope of the measure.

Or. en

Amendment 988
Anouk Van Brug, Joachim Streit

Proposal for a regulation
Article 14 – paragraph 5

Text proposed by the Commission	*Amendment*
5. Member States shall make available to the Commission the information on the progress in the selected output indicator in accordance with Article 59, paragraph 1, point (a) of Regulation …/… [National and Regional Partnership Plans] and actual results of the measure against the estimated value of the result indicator assigned to that measure. The information on the result indicator shall be updated by 15 February of each year, until 2037.	5. Member States shall make available to the Commission the information on the progress in the selected output indicator in accordance with Article 59, paragraph 1, point (a) of Regulation …/… [National and Regional Partnership Plans] and actual results of the measure against the estimated value of the result indicator assigned to that measure. The information on the result indicator shall be updated by 15 February of each year, until 2037. ***Member States shall, where possible, obtain that information from administrative data. They shall not require recipients to report on it after the completion of the operation. This shall be without prejudice to verifications, audits and investigations.***

Or. en

Justification

Annual updates of result indicators until 2037 would otherwise create a long-term reporting obligation for recipients after their operation has ended. Where possible, Member States should rely on administrative data. Verifications, audits and investigations, including in case of suspected irregularities or fraud, remain fully possible.

Amendment 989

Amendment 1006
Victor Negrescu

Proposal for a regulation
Article 14 e (new)

Text proposed by the Commission	*Amendment*
	Article 14e
	Accelerated support following natural disasters
	1. Within programmes and plans providing support for disaster response and recovery, the Commission and Member States shall establish accelerated procedures for requests concerning measures addressing the consequences of natural disasters. Requests shall be assessed within 30 calendar days of receipt of the information necessary to establish eligibility and financing needs. Information requirements shall be limited to what is necessary for that assessment, with existing official assessments reused wherever possible.
	2. Upon request, Member States and grant beneficiaries implementing those measures shall be entitled to increased pre-financing, with the total advance reaching up to 50% of the support approved for the measures or operation concerned, where justified by documented immediate liquidity needs. The advance shall be paid within 15 calendar days of approval of the request.
	3. Increased pre-financing shall form part of the approved support and shall be deducted from subsequent payments.

Financing arrangements shall provide for the clearance of advances and the recovery of unused or ineligible amounts. Accelerated procedures shall preserve applicable eligibility requirements and safeguards for the protection of the Union's financial interests.

Amendment 1007
Julien Sanchez, Angéline Furet, Virginie Joron

Proposal for a regulation
Article 15

Text proposed by the Commission	*Amendment*
Article 15	***supprimé***
Mise en œuvre dans le cadre des plans des pays tiers — suivi et compte rendu de la performance	
1. Pour chaque mesure des plans des pays tiers, la Commission attribue au moins un domaine d'intervention de l'annexe I et, dans la mesure du possible, veille à ce que, dans leurs plans, les pays tiers utilisent les indicateurs de performance visés à l'article 8, paragraphe 1, premier alinéa, point c). La Commission formule des observations ou demande des informations complémentaires, si nécessaire. Les conventions conclues avec le pays tiers concerné prévoient l'obligation pour celui-ci de fournir les informations complémentaires demandées et de réviser les indicateurs de performance proposés si nécessaire.	
2. Les plans contiennent des dispositions appropriées relatives à la communication des données sur la performance et à la transmission électronique à la Commission des données de suivi sous-jacentes.

Proposal for a regulation
Article 18 – paragraph 3 – subparagraph 1

Text proposed by the Commission	*Amendment*
To fulfil the obligation laid down in paragraphs 1 and 2, the emblem of the Union shall be used and a funding statement that reads '***Supported*** by the European Union'**,** or 'In partnership with the European Union' for external actions, shall be provided when carrying out information, communication and visibility actions, in accordance with Annex V. The emblem of the Union and the funding statement shall, in particular, feature in	To fulfil the obligation laid down in paragraphs 1 and 2, the emblem of the Union shall be used and a funding statement that reads '***Cofunded*** by the European Union' ***or 'Funded by the European Union' for operations fully financed by the European Union*** or 'In partnership with the European Union' for external actions, shall be provided when carrying out information, communication and visibility actions, in accordance with

press or communication material, websites and other digital supports.	Annex V. The emblem of the Union and the funding statement shall, in particular, feature in press or communication material, websites and other digital supports ***addressed to the public.In duly justified cases, Member States may grant exemptions from these rules***.

Or. en

Justification

It is requested to include an explicit provision allowing Member States to grant exemptions in duly justified cases, for example where restrictions applicable to UNESCO sites or listed historical buildings prevent the placement of durable plaques or billboards.This would not allow arbitrary exemptions, but would address cases where heritage-protection rules prevent beneficiaries from placing billboards or commemorative plaques on protected buildings, as this could impair their historical appearance. EU-funded repairs can still be publicised, for example through a temporary billboard on scaffolding during implementation. For larger sites, a commemorative plaque may be placed in a less prominent location, subject to agreement with the heritage authorities. In densely built-up historic city centres, beneficiaries otherwise have very limited options.

Amendment 1063
Stine Bosse, Gerben-Jan Gerbrandy

Proposal for a regulation
Article 18 – paragraph 3 – subparagraph 1

Text proposed by the Commission	*Amendment*
To fulfil the obligation laid down in paragraphs 1 and 2, the emblem of the Union shall be used and a funding statement that reads ‘Supported by the European Union’, or ‘In partnership with the European Union’ for external actions, shall be provided when carrying out information, communication and visibility actions, in accordance with Annex V. The emblem of the Union and the funding statement shall, in particular, feature in press or communication material, websites and other digital supports.	To fulfil the obligation laid down in paragraphs 1 and 2, the emblem of the Union shall be used and a funding statement that reads ‘Supported ***by the European Union’, ‘Co-funded*** by the European Union’, or ‘In partnership with the European Union’ for external actions, shall be provided when carrying out information, communication and visibility actions, in accordance with Annex V. The emblem of the Union and the funding statement shall, in particular, feature in press or communication material, websites and other digital supports.

Or. en

Amendment 1064
Jana Nagyová, Klara Dostalova, Ondřej Knotek, Jaroslav Bžoch, Tomáš Kubín, Jaroslava Pokorná Jermanová, Kateřina Konečná

Proposal for a regulation
Article 18 – paragraph 3 – subparagraph 2

Text proposed by the Commission	*Amendment*
For operations, other than financial instruments or budgetary guarantees***,*** ***involving investment in tangible assets,*** the total cost of ***which*** exceeds EUR ***100 000***, durable plaques or billboards that are clearly visible to the public and that present the emblem of the Union and the funding statement referred to in the first subparagraph shall be displayed, as soon as the physical implementation of the operation starts or purchased equipment is installed and for ***as long as the tangible asset is in use***.	For operations, other than financial instruments or budgetary guarantees ***or EU school schemes, where*** the total cost of ***the tangible asset*** exceeds EUR ***300 000***, durable plaques or billboards ***or equivalent electronic displays*** that are clearly visible to the public and that present the emblem of the Union and the funding statement referred to in the first subparagraph shall be displayed, as soon as the physical implementation of the operation starts or purchased equipment is installed and for ***at least five years after the final payment to the beneficiary***.

Or. en

Justification

Two different thresholds for different funds create an unnecessary administrative burden, as monitoring systems and other implementation tools would need to establish and maintain more complex and differentiated requirements for beneficiaries. They would also lead to a significant disparity in the treatment of operations financed under different funds.The threshold should therefore be harmonised across EU instruments at EUR 300 000.

Amendment 1065
Stine Bosse, Gerben-Jan Gerbrandy

Proposal for a regulation
Article 18 – paragraph 3 – subparagraph 2

Text proposed by the Commission	*Amendment*
For operations, other than financial instruments or budgetary guarantees, involving investment in tangible assets***, the***	For operations, other than financial instruments or budgetary guarantees, involving investment in tangible assets,

durable plaques or billboards that are clearly visible to the public and that present the emblem of the Union and the funding statement referred to in the first subparagraph shall be displayed, as soon as the physical implementation of the operation starts or purchased equipment is installed and for as long as the tangible asset is in use.

Or. en

Amendment 1066
Jana Nagyová, Klara Dostalova, Ondřej Knotek, Jaroslav Bžoch, Tomáš Kubín, Jaroslava Pokorná Jermanová, Kateřina Konečná

Proposal for a regulation
Article 18 – paragraph 3 – subparagraph 2 a (new)

Text proposed by the Commission	*Amendment*
	For multiple operations involving a single recipient and taking place at the same location, a single durable plaque or billboard or equivalent electronic display may be used, provided that all the information is clearly visible.

Or. en

Justification

To minimise the administrative burden and avoid disproportionate costs for beneficiaries, the option for a single beneficiary to communicate multiple projects through a single medium, as permitted in the 2021-2027 programming period, should be retained.

Amendment 1067
Jana Nagyová, Klara Dostalova, Ondřej Knotek, Jaroslav Bžoch, Tomáš Kubín, Jaroslava Pokorná Jermanová, Kateřina Konečná

Proposal for a regulation
Article 18 – paragraph 4

Text proposed by the Commission	*Amendment*
4. The Commission shall implement information, visibility and communication actions and campaigns relating to the Union's policies, priorities, actions and results directed towards multiple audiences, including the media and the public. Financial resources allocated to the programmes and activities ***shall*** also contribute to the corporate communication of the political priorities of the Union.	4. The Commission ***and Member State*** shall implement information, visibility and communication actions and campaigns relating to the Union's policies, priorities, actions and results directed towards multiple audiences, including the media and the public. Financial resources allocated to the programmes and activities ***may*** also contribute to the corporate communication of the political priorities of the Union.

Or. en

Justification

It is requested that the role of the Member State be reflected in this provision. If campaigns may be funded from the NRPP budget, which concerns the rights and responsibilities of Member States, the Commission and the Member State should be placed on an equal footing.The change from "shall" to "may" is requested.

Amendment 1074
Jana Nagyová, Klara Dostalova, Ondřej Knotek, Jaroslav Bžoch, Tomáš Kubín, Jaroslava Pokorná Jermanová, Kateřina Konečná

Proposal for a regulation
Article 19 – paragraph 5

Text proposed by the Commission	*Amendment*
5. Personal data shall be collected directly from the persons concerned, or by re-using information stored in ***administrative or statistical*** registers.	5. ***(Article 19 (4))*** Personal data shall be collected directly from the persons concerned, or by re-using information stored in registers ***in compliance with relevant Union or national legislation***.

Or. en

Justification

The word "statistical" should be deleted from the draft Regulation. Personal data in statistical registers are collected exclusively for statistical purposes and are confidential.Under Article 20 of Regulation (EC) No 223/2009, confidential data obtained solely for the production of European statistics may be used by national statistical institutes, other national authorities and the Commission (Eurostat) exclusively for statistical purposes, unless the statistical unit has clearly consented to another use. Article 3(8) of that Regulation defines "use for statistical purposes" as the exclusive use for developing, producing and disseminating statistical results and analyses by statistical authorities, including for research, scientific activities and the establishment of sampling frames.Since the proposed Article allows Member States and the Commission to process personal data for their obligations under this Regulation and the NRPP Regulation, including monitoring, reporting, communication, publication, evaluation, financial management, verification, audit and, where applicable, determining participant eligibility, the wording "or statistical" should be removed.

Amendment 1075

1. Le pouvoir d'adopter des actes délégués conféré à la Commission est soumis aux conditions fixées au présent article.	
2. Le pouvoir d'adopter des actes délégués visé aux articles 4, 7, 8, 12 et 18 est conféré à la Commission pour une durée indéterminée à partir du […].	

3. Les délégations de pouvoir visées aux articles 4, 7, 8, 12 et 18 peuvent être révoquées à tout moment par le Parlement européen ou le Conseil. La décision de révocation met fin à la délégation de pouvoir qui y est précisée. La révocation prend effet le jour suivant celui de la publication de ladite décision au Journal officiel de l'Union européenne ou à une date ultérieure qui est précisée dans ladite décision. Elle ne porte pas atteinte à la validité des actes délégués déjà en vigueur.

4. Avant l'adoption d'un acte délégué, la Commission consulte les experts désignés par chaque État membre, conformément aux principes définis dans l'accord interinstitutionnel du 13 avril 2016 «Mieux légiférer».

5. Aussitôt qu'elle adopte un acte délégué, la Commission le notifie au Parlement européen et au Conseil simultanément.

6. Un acte délégué adopté en vertu des articles 7, 8, 12 et 18 n'entre en vigueur que si le Parlement européen ou le Conseil n'a pas exprimé d'objections dans un délai d'un mois à compter de la notification de cet acte au Parlement européen et au Conseil ou si, avant l'expiration de ce délai, le Parlement européen et le Conseil ont tous deux informé la Commission de leur intention de ne pas exprimer d'objections. Ce délai est prolongé d'un mois à l'initiative du Parlement européen ou du Conseil.

Amendment 1139
Jana Nagyová, Klara Dostalova, Ondřej Knotek, Jaroslav Bžoch, Tomáš Kubín, Jaroslava Pokorná Jermanová, Kateřina Konečná

Proposal for a regulation
Annex V – point 1 – point a

Text proposed by the Commission	*Amendment*
(a) The emblem and the funding statement shall be prominently displayed on all information, communication and visibility activities related to the implementation of Union-supported actions. This includes, in particular, media relations, conferences, seminars, and information materials such as brochures, leaflets, posters, banners, presentations and merchandise, as well as digital products, websites (including mobile views), and traditional or social media platforms. Infrastructures, vehicles, supplies and equipment ***used or delivered under and*** EU-(co) funded actions ***must*** be clearly ***identified***.	(a) The emblem and the funding statement shall be prominently displayed on all information, communication and visibility activities ***addressed to the public*** related to the implementation of Union-supported actions. This includes, in particular, media relations, conferences, seminars, and information materials such as brochures, leaflets, posters, banners, presentations and merchandise, as well as digital products, websites (including mobile views), and traditional or social media platforms. ***The emblem and the funding statement on*** infrastructures, vehicles, supplies and equipment ***purchased in the framework of*** EU-(co) funded actions ***shall*** be clearly ***displayed if accessible and visible to the public, in a proportionate manner, taking into account the size and visibility of the operation***. ***In the case of formats that do not allow visual display (audio formats) and in justified cases, such display may be replaced by the statement "Co-funded by the European Union" or "Funded by the European Union".***

Or. en

Justification

In line with the revision of Article 18(3), paragraph 1(a) should be amended to specify that the EU emblem and accompanying text are required only for outputs addressed to the public and participants, not for all outputs, including administrative documents. Labelling all purchased equipment would not be effective.To reduce the administrative burden, visibility requirements for infrastructure, vehicles, supplies and equipment should apply proportionately, taking into account whether they are accessible and visible to the public, as well as the size and visibility of the operation.For formats that do not allow visual display, the visibility requirement should be able to be met through the statement "Co-funded by the European Union" or "Funded by the European Union", rather than through a visual display of the emblem and funding statement. In justified cases, an audio version of the message should also be permitted.

Amendment 1140
Jana Nagyová, Klara Dostalova, Ondřej Knotek, Jaroslav Bžoch, Tomáš Kubín, Jaroslava Pokorná Jermanová, Kateřina Konečná

Proposal for a regulation
Annex V – point 1 – point b

Text proposed by the Commission	*Amendment*
(b) The funding statement ***'Supported*** by the European Union***'*** shall always be spelled out in full and placed ***next to*** the emblem. It shall be translated into local languages. ***If requested by*** the Commission, the funding statement may be replaced with the words 'European Union'. This simplified statement shall be written out in full and be translated into local languages.	(b) The funding statement ***"Co-funded*** by the European Union***" or "Funded by the European Union"*** shall always be spelled out in full and placed ***together with*** the emblem. It shall be translated into local languages. ***In agreement with*** the Commission ***In strictly needed cases***, the funding statement may be replaced with the words 'European Union'. This simplified statement shall be written out in full and be translated into local languages.

Or. en

Justification

It is requested that the restriction on the use of the shortened version of the logo be removed, as experience to date has shown that flexible solutions are needed for communication with beneficiaries.For example, where a beneficiary needs to place only a logo with abbreviated text on a small promotional item because no other option would fit, the beneficiary would have to contact the managing authority, which would in turn have to request an exemption from the European Commission. This is not a workable model.It is therefore proposed to retain the option available under the Regulation in previous programming periods, which allowed beneficiaries, in limited cases, to use the logo with only the text "European Union".It is therefore proposed to retain the option already available under the Regulation in previous programming periods, which allowed beneficiaries, in limited cases, to use the logo with only the text "European Union".

Amendment 1141
Stine Bosse, Gerben-Jan Gerbrandy

Proposal for a regulation
Annex V – point 1 – point b

Amendment 1144
Jana Nagyová, Klara Dostalova, Ondřej Knotek, Jaroslav Bžoch, Tomáš Kubín, Jaroslava Pokorná Jermanová, Kateřina Konečná

Proposal for a regulation
Annex V a (new)

Text proposed by the Commission	*Amendment*
	Annex V(a) Rules for the application of the 'do no significant harm' principle
	1. Environmental objectives and significant harm For the purposes of Article 5, the environmental objectives and the criteria for determining significant harm shall be those set out below [the EC to fill in the appropriate text]
	2. Assessment requirements
	(a) Activities consisting exclusively of education, training, information, advisory services or administrative support, which do not finance infrastructure, construction works, equipment or other physical assets, shall be deemed to comply with the principle. No separate DNSH assessment shall be required for those activities.
	(b) For other activities, the assessment shall address only environmental objectives for which the activity may

cause significant harm. Where no significant harm to an objective is reasonably foreseeable, a brief explanation shall suffice for that objective.

(c) The scope and detail of the assessment shall be proportionate to the nature, scale and foreseeable environmental impacts of the activity, taking into account its location and the relevant territorial conditions. Existing life-cycle assessments shall be used where available. A separate full life-cycle assessment shall not be required solely for the purposes of this Annex.

3. Reuse of existing information
Information, permits and assessments already available under applicable Union or national environmental law shall be used to demonstrate compliance insofar as they address the same environmental objectives and significant-harm criteria. Additional information may be requested only to address relevant risks not covered by those documents. The same information shall not be requested more than once.

4. Exemptions and derogations

(a) Activities primarily serving defence, security or space objectives shall be exempt from the application of the principle and from the requirement to provide a DNSH assessment.

(b) A derogation may be applied to activities strictly necessary to respond to a crisis, including a natural catastrophe, or to protect human life or health, public security or the continuity of essential public services, where compliance would prevent or materially delay the necessary response and no reasonably feasible alternative causing less environmental harm is available.

The derogation shall be limited to what is necessary in scope and duration. The competent authority shall record the

reasons for applying it, the alternatives considered and the measures taken to minimise environmental harm. In an emergency, that justification may be recorded without undue delay after the activity has commenced.

5. Applicable law This Annex shall not exempt any activity from compliance with applicable Union or national environmental law.

Or. en

Justification

The Annex sets out the substantive rules, a simplified regime for clearly defined activities, proportionate assessments for other activities, safeguards against duplication, and expressly defined exemptions and derogations. It does not an environmental permit alone as automatic proof of compliance with all DNSH criteria.

Amendment 1145
Céline Imart, Isabelle Le Callennec, Christophe Gomart, François-Xavier Bellamy, Nadine Morano, Brice Hortefeux

Proposal for a regulation
Annex V a (new)

Text proposed by the Commission	*Amendment*
	Annexe VI - Activités non éligibles aux financements au titre du DNSH
	Les activités exclues du financement au titre de l'article 5 (principe consistant à ne pas causer de préjudice important) sont énumérées ci-après de manière exhaustive, elles ne peuvent relever ni de la PAC ni de la PCP et les investissements qui y sont associés ne peuvent pas être inclus dans cette liste.
	Aucune activité supplémentaire ne peut être exclue sans modification du présent règlement.
	[...]

Or. fr

Justification

La Commission a commencé à travailler à l'élaboration d'une liste qui devra être insérer en annexe du présent règlement. Le Parlement doit pouvoir la modifier avant son insertion comme annexe au présent règlement.

Amendment 1155
Ruggero Razza, Carlo Fidanza
on behalf of the ECR Group

Proposal for a resolution
Annex I – table -row 1

Text proposed by the Commission

Policy area (level 1)	**Policy area (level 2)**	**#**	**Intervention field**	**CCM**	**CCA**	**ENV**	**SOC**	**Output indicator**	**Result indicator**
Agricoltura e pesca	Agricoltura	1	Promozione del ricambio generazionale degli agricoltori	***0 %***	***0%***	***0%***	***0%***	• Numero di agricoltori; • Numero di progetti di cooperazione; • Numero di accordi di finanziamento; • Numero di piccoli agricoltori in paesi terzi;	• Numero di nuovi giovani agricoltori e di altri nuovi agricoltori beneficiari di sostegno – per genere;

Amendment

Policy area (level 1)	Policy area (level 2)	#	Intervention field	CCM	CCA	ENV	SOC	Output indicator	Result indicator
Agricoltura e pesca	Agricoltura	1	Promozione del ricambio generazionale degli agricoltori	***40 %***	***100 %***	***40 %***	***100 %***	• Numero di agricoltori; • Numero di progetti di cooperazione; • Numero di accordi di finanziamento; • Numero di piccoli agricoltori in paesi terzi;	• Numero di nuovi giovani agricoltori e di altri nuovi agricoltori beneficiari di sostegno – per genere;

Motivazione

Il settore agricolo svolge un ruolo cruciale e insostituibile nella gestione sostenibile e nella vitalità socioeconomica delle aree rurali: le imprese agricole sono di fatto l'unico presidio in grado di attuare su vasta scala pratiche ecologiche ad alto impatto. Dato il contributo primario e diretto di queste attività agli obiettivi europei di mitigazione e adattamento, il regolamento dovrebbe riconoscerlo con coefficienti adeguati. Il ricambio generazionale è un vettore strategico per la sostenibilità futura, la resilienza e la gestione ambientale attiva dei territori rurali. I giovani agricoltori portano innovazione tecnologica, competenze digitali e pratiche agronomiche evolute, oggi il principale argine contro abbandono delle terre, dissesto idrogeologico e spopolamento. Attribuire un coefficiente pari a zero alle misure per il ricambio generazionale è un'impostazione concettualmente ed economicamente errata: il loro apporto va riconosciuto con coefficienti proporzionati all'impatto positivo effettivo.

Motivazione

Il settore agricolo svolge un ruolo cruciale e insostituibile nella gestione sostenibile e nella vitalità socioeconomica delle aree rurali: le imprese agricole sono di fatto l'unico presidio in grado di attuare su vasta scala pratiche ecologiche ad alto impatto. Dato il contributo primario e diretto di queste attività agli obiettivi europei di mitigazione e adattamento, il regolamento dovrebbe riconoscerlo con coefficienti adeguati.

Le colture proteiche e la loro combinazione con l'erba migliorano la fertilità del suolo grazie alla fissazione dell'azoto, riducono l'uso di fertilizzanti di sintesi e rafforzano la resilienza dei sistemi agricoli: il loro contributo all'adattamento e agli obiettivi ambientali va pienamente riconosciuto.

Motivazione

Il settore agricolo svolge un ruolo cruciale e insostituibile nella gestione sostenibile e nella vitalità socioeconomica delle aree rurali: le imprese agricole sono di fatto l'unico presidio in grado di attuare su vasta scala pratiche ecologiche ad alto impatto. Dato il contributo primario e diretto di queste attività agli obiettivi europei di mitigazione e adattamento, il regolamento dovrebbe riconoscerlo con coefficienti adeguati.

L'allevamento di ruminanti, in particolare nei sistemi estensivi e basati sui pascoli, contribuisce allo stoccaggio di carbonio nei prati permanenti, alla cura del paesaggio e al tessuto economico e sociale delle aree rurali e marginali: ciò dovrebbe riflettersi nei coefficienti CCM e SOC.

Motivazione

Il settore agricolo svolge un ruolo cruciale e insostituibile nella gestione sostenibile e nella vitalità socioeconomica delle aree rurali: le imprese agricole sono di fatto l'unico presidio in grado di attuare su vasta scala pratiche ecologiche ad alto impatto. Dato il contributo primario e diretto di queste attività agli obiettivi europei di mitigazione e adattamento, il regolamento dovrebbe riconoscerlo con coefficienti adeguati.

Il sostegno accoppiato agli altri settori in difficoltà, compresa l'apicoltura, preserva produzioni che contribuiscono alla biodiversità, all'impollinazione e alla vitalità delle aree rurali: un coefficiente nullo su tutti gli obiettivi non riflette questo contributo.

Motivazione

Il settore agricolo svolge un ruolo cruciale e insostituibile nella gestione sostenibile e nella vitalità socioeconomica delle aree rurali: le imprese agricole sono di fatto l'unico presidio in grado di attuare su vasta scala pratiche ecologiche ad alto impatto. Dato il contributo primario e diretto di queste attività agli obiettivi europei di mitigazione e adattamento, il regolamento dovrebbe riconoscerlo con coefficienti adeguati.

Il sostegno agli agricoltori delle zone montane è decisivo per prevenire abbandono e spopolamento e mantenere il presidio del territorio: il suo contributo sociale va riconosciuto con un coefficiente SOC del 100 %.

Agricoltura e pesca	Agricoltura	15	Investimenti verdi, comprese misure di resilienza ai cambiamenti climatici	100 %	100 %	***100 %***	0 %	• Numero di operazioni; • Numero di accordi di finanziamento; • Numero di piccoli agricoltori in paesi terzi;	• Capacità installata per le energie rinnovabili (in MW); • Percentuale di aziende agricole che ricevono un sostegno agli investimenti che contribuisce alla mitigazione dei cambiamenti climatici e all'adattamento ad essi; • Percentuale di aziende agricole che ricevono un sostegno agli investimenti in relazione alle risorse naturali; • Percentuale di aziende agricole che ricevono un sostegno agli investimenti in relazione alla natura e alla biodiversità; • Emissioni di gas a effetto serra evitate e assorbimenti di gas a effetto serra in tCO_2e; • Riduzione delle emissioni di ammoniaca; • Percentuale di aziende agricole che hanno aumentato la propria digitalizzazione e il proprio uso di strumenti digitali; • Numero di investimenti verdi che beneficiano di sostegno in imprese rurali diverse dalle aziende agricole e dai silvicoltori; • Valore dei beni e/o Popolazione che beneficiano di misure di resilienza ai cambiamenti climatici;

Motivazione

Il settore agricolo svolge un ruolo cruciale e insostituibile nella gestione sostenibile e nella vitalità socioeconomica delle aree rurali: le imprese agricole sono di fatto l'unico presidio in grado di attuare su vasta scala pratiche ecologiche ad alto impatto. Dato il contributo primario e diretto di queste attività agli obiettivi europei di mitigazione e adattamento, il regolamento dovrebbe riconoscerlo con coefficienti adeguati.

Gli investimenti verdi nelle aziende agricole producono benefici diretti per le risorse naturali, la natura e la biodiversità, come mostrano gli stessi indicatori di risultato del settore: il coefficiente ambientale va portato al 100 %.

Amendment

Policy area (level 1)	Policy area (level 2)	#	Intervention field	CCM	CCA	ENV	SOC	Output indicator	Result indicator

Agricoltura e pesca	Agricoltura	16	Investimenti nell'agricoltura e nella silvicoltura (diversi da quelli verdi o destinati a migliorare la salute degli animali, la biosicurezza e il benessere degli animali)	***40 %***	***40 %***	***40 %***	***40 %***	• Numero di operazioni; • Numero di piccoli agricoltori; • Numero di accordi di finanziamento; • Numero di piccoli agricoltori in paesi terzi	• Percentuale di aziende agricole che ricevono sostegno per aumentare i risultati economici, anche per migliorare l'efficienza delle risorse e diversificare il reddito delle famiglie; • Investimenti produttivi totali, comprese le infrastrutture, nel settore forestale; • Numero di posti di lavoro sostenuti o creati; • Percentuale di aziende agricole che hanno aumentato la propria digitalizzazione e il proprio uso di strumenti digitali; • Capacità installata per le energie rinnovabili (in MW); • Emissioni di gas a effetto serra evitate e assorbimenti di gas a effetto serra in tCO_2e; • Riduzione delle emissioni di ammoniaca;

Motivazione

Il settore agricolo svolge un ruolo cruciale e insostituibile nella gestione sostenibile e nella vitalità socioeconomica delle aree rurali: le imprese agricole sono di fatto l'unico presidio in grado di attuare su vasta scala pratiche ecologiche ad alto impatto. Dato il contributo primario e diretto di queste attività agli obiettivi europei di mitigazione e adattamento, il regolamento dovrebbe riconoscerlo con coefficienti adeguati.

Gli investimenti produttivi in agricoltura e silvicoltura migliorano l'efficienza delle risorse, riducono le emissioni e sostengono l'occupazione, come riflettono gli indicatori di risultato del settore (emissioni evitate, riduzione dell'ammoniaca, posti di lavoro): un coefficiente nullo è incoerente con tali indicatori.

Agricoltura e pesca	***Agricoltura***	***16 bis***	***Investimenti in agricoltura di precisione***	***100 %***	***100 %***	***100 %***	***0 %***	• ***Numero di operazioni;*** • ***Numero di accordi di finanziamento;***	• ***Percentuale di aziende agricole che hanno aumentato la propria digitalizzazione e il proprio uso di strumenti digitali;*** • ***Emissioni di gas a effetto serra evitate e assorbimenti di gas a effetto serra in tCO2e;*** • ***Riduzione delle emissioni di ammoniaca;***

Motivazione

Il settore agricolo svolge un ruolo cruciale e insostituibile nella gestione sostenibile e nella vitalità socioeconomica delle aree rurali: le imprese agricole sono di fatto l'unico presidio in grado di attuare su vasta scala pratiche ecologiche ad alto impatto. Dato il contributo primario e diretto di queste attività agli obiettivi europei di mitigazione e adattamento, il regolamento dovrebbe riconoscerlo con coefficienti adeguati.

L'agricoltura di precisione consente un uso mirato di acqua, fertilizzanti e prodotti fitosanitari, con benefici diretti per mitigazione, adattamento e ambiente: va identificata come settore di intervento dedicato con coefficienti che riflettano tale contributo.

Agriculture and fisheries	Agriculture	25	Agricultural advisory services	0%	0%	0%	0%	• Number of operations; • Number of services set-up; • Number of smallholders in third countries;	• Number of people advised or trained; • Number of farm advisors trained;

Amendment

Policy area (level 1)	**Policy area (level 2)**	**#**	**Intervention field**	**CCM**	**CCA**	**ENV**	**SOC**	**Output indicator**	**Result indicator**
Agriculture and fisheries	Agriculture	25	Agricultural advisory services ***and vocational training***	0%	0%	0%	0%	• Number of operations; • Number of services set-up; • Number of smallholders in third countries;	• Number of people advised or trained; • Number of farm advisors trained;

Justification

It is suggested to add "and vocational training" to the name of the intervention field. Alternatively, the title proposed in the Council partial mandate (Agriculturl advisory services and knowledge sharing) is also acceptable, as it reflects the request to broaden the scope of the intervention field to include the sharing and transfer of knowledge and experience in agriculture.

Amendment 1192

Amendment

Policy area (level 1)	**Policy area (level 2)**	**#**	**Intervention field**	**CCM**	**CCA**	**ENV**	**SOC**	**Output indicator**	**Result indicator**
Agriculture and fisheries	Agriculture and forestry	37	Green investments in forest and forestry, including climate resilience measures	40%	100 %	40%	0%	• Number of operations, ***separately operations contributing to implementation of national restoration plan***;	• Hectares of restored forest area • GHG emissions avoided and ***net*** removals in tCO_2e; • Value of assets and / or Population benefitting from climate ***resilience including water resilience*** measures;

Justification

If there is, rightly, Union support for restoration of forest area, at least in part it should be contributing to implementation of national restoration plans. MEPs and Member States were very vocal that there should be support for it from Union funding. Woody landscape features indicator is deleted as it doesn't make sense for forest area.

Sostegno alle imprese	***Investimenti in tecnologie***	***86 bis***	***Fabbricazione di tecnologie avanzate per la fissione nucleare (compresi gli impianti di produzione di combustibile nucleare avanzato)***	***100%***	***0%***	***0%***	***0%***	• ***Numero di imprese beneficiarie di sostegno – per microimprese, piccole, medie e grandi imprese;***	• ***Numero di posti di lavoro sostenuti o creati nelle imprese beneficiarie di sostegno – per genere;*** • ***Investimenti mobilitati (EUR);*** • ***Aumento della capacità (produzione annua);***

Motivazione

L'energia nucleare è riconosciuta dal diritto dell'Unione come contributo alla neutralità climatica, essendo inclusa tra le tecnologie a zero emissioni nette del regolamento (UE) 2024/1735. La fabbricazione di tecnologie avanzate di fissione e del relativo combustibile avanzato dovrebbe quindi costituire un settore di intervento dedicato, con un coefficiente CCM del 100 %, in linea con il suo riconoscimento come tecnologia a zero emissioni nette, e un coefficiente SOC del 100 %, per l'occupazione qualificata attesa dall'espansione della produzione di componenti nucleari nell'Unione.

Amendment

Policy area (level 1)	Policy area (level 2)	#	Intervention field	CCM	CCA	ENV	SOC	Output indicator	Result indicator

context OBTAINED BY OBTENU PAR

Digital technologies and infrastructures	Connectivity	97	Digital backbone networks *and backhaul*, including subsea cable networks (excl. satellites)	0%	0%	0%	0%	• ***1 newly deployed terrestrial backbone and/or backhaul networks, in km;*** • Total length of upgraded submarine/terrestrial cables, in km; • Total additional capacity created, in number of fibre-pairs; • Total additional capacity created, in Tbps; • Number of cable	• Number of supported strategic cable projects – by type (Cable Projects of European Interest/others); • Number of users of new and upgraded public digital services, products and processes; • Number of users of new and upgraded digital services, products and processes developed by enterprises • Number of enterprises reaching high digital intensity;

Justification

The inclusion of the term "backhaul" in the title of the intervention field and the related indicator is requested, as it ensures that investments in terrestrial backhaul networks can be properly reported and costed. Without this adjustment, the deployment of very high-capacity networks (VHCN), particularly in internet white areas such as rural and less-developed regions, would be significantly more difficult.

Amendment

Policy area (level 1)	**Policy area (level 2)**	**#**	**Intervention field**	**CCM**	**CCA**	**ENV**	**SOC**	**Output indicator**	**Result indicator**
Education and skills	Education	111	Early childhood education and care (excluding infrastructure)*	0%	0%	0%	100 %	• Number of teachers trained – by gender and age; • Number of ***new/revised*** curricula, study programmes, ***educational products*** or courses implemented; • Number of teaching or learning equipment and digital means provided; • Number of organisations involved in cooperation projects***, including international***; • Number of new childcare places created or maintained; • ***Number of organisations participating in cooperation;***	• Number of children benefitting from curricula developed and programme implemented; • Number of children benefitting from teachers trained; • Number of children benefitting from equipment ***or digital means provided***; • ***Number of organisations benefitting from their participation in cooperation activities across borders, including international;*** • ***Number of organisations benefitting from cooperation.***

Justification

A more universal indicator is needed to capture cooperation activities at domestic, cross-border and international levels.
It is also suggested that the term "purchased" be replaced with "provided" in the result indicator. Benefiting from equipment does not always require its purchase; for example, in education, equipment may be provided only on loan. The term "provided" is therefore more appropriate for both the output and result indicators.

ecomtexte OBTAINED BY · OBTENU PAR

Education and skills	Education	114	Tertiary education (excluding infrastructures)	0%	0%	0%	100 %	• Number of teachers trained – by gender and age; • Number of ***new/revised*** curricula, study programmes, ***educational products*** or courses implemented; • Number of teaching or learning equipment and digital means provided; • Number of organisations involved in cooperation projects***, including international***; • Number of new childcare places created or maintained; • ***Number of organisations participating in cooperation;*** • ***Number of new/revised curricula, study programmes, educational products or courses implemented***	• Number of children benefitting from curricula developed and programme implemented; • Number of children benefitting from teachers trained; • Number of children benefitting from equipment ***or digital means provided***; • ***Number of organisations benefitting from their participation in cooperation activities across borders, including international;*** • ***Number of organisations benefitting from cooperation.*** • ***Number of children/learners benefitting from curricula, study programmes or courses implemented;*** • ***Number of children/learners benefitting from teachers trained;*** • ***Number of children/learners benefitting from equipment or digital means provided;***

Justification

A more universal indicator is needed to capture cooperation activities at domestic, cross-border and international levels.
It is also suggested that the term "purchased" be replaced with "provided" in the result indicator. Benefiting from equipment does not always require its purchase; for example, in education, equipment may be provided only on loan. The term "provided" is therefore more appropriate for both the output and result indicators.
The term "children" should be replaced with a more universal term, as it is more appropriate specifically for pre-school education.
The addition of "educational products" to intervention fields 112–115 is requested. For consistency, the same type of indicator should also be reflected across other levels of education, not only intervention field 111. The current situation appears to be an administrative oversight rather

than a deliberate policy choice.

Education and skills	Skills	129	Basic digital skills	0%	0%	0%	100 %	• Number of participants – by gender, by labour market status, by age, and by education level; • Number of organisations participating in cooperation	• Number of participants gaining a qualification or self reported skills improvement – by gender; • Number of organisations benefitting cooperation; • Number of participants who have reached at least a basic level of digital skills according to the ESTAT's DSI definition – by gender;

Justification

The revision of the output indicator to "Number of organisations participating in cooperation" and the result indicator to "Number of organisations benefiting from cooperation" is welcomed, as it allows cooperation activities at national level to be adequately captured and reported.
The newly introduced indicator "Number of organisations supported" can partially serve this purpose.

Policy area (level 1)	Policy area (level 2)	#	Intervention field	CCM	CCA	ENV	SOC	Output indicator	Result indicator
Education and skills	Skills	133	Up-skilling and re-skilling for persons with disabilities	0%	0%	0%	100 %	• Number of participants – by gender, by labour market status, by age, and by education level; • Number of organisations ***involved in transnational*** cooperation activities;	• Number of participants gaining a qualification or self reported skills improvement – by gender; • Number of organisations benefitting from ***their participation in cross-border*** cooperation ***activities***;

Amendment

Policy area (level 1)	Policy area (level 2)	#	Intervention field	CCM	CCA	ENV	SOC	Output indicator	Result indicator

Education and skills	Skills	133	Up-skilling and re-skilling for persons with disabilities	0%	0%	0%	100 %	• Number of participants – by gender, by labour market status, by age, and by education level; • Number of organisations participating in cooperation	• Number of participants gaining a qualification or self reported skills improvement – by gender; • Number of organisations benefitting cooperation;

Justification

The revision of the output indicator to "Number of organisations participating in cooperation" and the result indicator to "Number of organisations benefiting from cooperation" is welcomed, as it allows cooperation activities at national level to be adequately captured and reported.
The newly introduced indicator "Number of organisations supported" can partially serve this purpose.

Amendment 1282
Jana Nagyová, Klára Dostálová, Jaroslava Pokorná Jermanová, Kateřina Konečná, Ondřej Knotek, Jaroslav Bžoch, Jaroslav Knot, Tomáš Kubín

Proposal for a resolution
Annex I – table -row 133 a (new)

Amendment

Policy area (level 1)	Policy area (level 2)	#	Intervention field	CCM	CCA	ENV	SOC	Output indicator	Result indicator

Education and skills	***Skills***	***133a***	***Improving access of girls and women to STEM education and training***	***0%***	***0%***	***0%***	***100 %***	• ***Number of new/revised curricula, study programmes or courses implemented;***	

Justification

It is suggested to add a new intervention field with a gender equality score of 2, focused on reducing gender stereotypes and segregation in education and training, for example "Combating gender stereotypes in education". Alternatively, the newly added intervention field 133a in the partial mandate could serve this purpose and may be sufficient.

Justification

The revision of the output indicator to "Number of organisations participating in cooperation" and the result indicator to "Number of organisations benefiting from cooperation" is welcomed, as it allows cooperation activities at national level to be adequately captured and reported.
The newly introduced indicator "Number of organisations supported" can partially serve this purpose.
For the indicator "Number of adult learners benefiting from equipment purchased/provided or digital means purchased/provided", it is requested that the term "purchased" be replaced with "provided". Benefiting from equipment does not always require its purchase; for example, in education, equipment may be provided only on loan. The term "provided" is therefore more appropriate for both the output and result indicators.

Education and skills	Youth	136	Non-formal and informal education and learning (excluding infrastructures)	0%	0%	0%	100 %	• Number of participants – by gender, by age, by socio-economic background; • Number of organisations involved in cooperation;	• Number of participants considering that they have benefitted from their participation; • Number of participants considering that they have increased their key competences; • Number of participants considering that they have an increased European sense of belonging;

Justification

The current wording of the output indicator, "Number of organisations involved in cross-border cooperation partnerships in the field of youth", limits organisational cooperation to the cross-border or international level. However, cooperation between educational and other organisations can also take place at domestic level.
The requested modification would make the indicator more universal and comprehensive.

Amendment 1314
Jana Nagyová, Klára Dostálová, Jaroslava Pokorná Jermanová, Kateřina Konečná, Ondřej Knotek, Jaroslav Bžoch, Jaroslav Knot, Tomáš Kubín

Proposal for a resolution
Annex I – table -row 219

Text proposed by the Commission

Policy area (level 1)	Policy area (level 2)	#	Intervention field	CCM	CCA	ENV	SOC	Output indicator	Result indicator

contexte OBTAINED BY · OBTENU PAR

Energy	Energy efficiency	219	***Other social infrastructures (including pre-school and care centres) – Light renovation****	100 %	40%	40%	40%	• m2 renovated and number of places improved – by types: pre-schools, care facilities, other;	• Annual GHG emissions avoided in tCO2e; • MWh of energy savings; • Average kWh/m2 primary energy (before-after); • Number of annual users of new or modernised facilities – by types: pre-schools, care facilities, others; • Value of assets and / or Population benefitting from climate resilience measures;

Amendment

Policy area (level 1)	**Policy area (level 2)**	**#**	**Intervention field**	**CCM**	**CCA**	**ENV**	**SOC**	**Output indicator**	**Result indicator**
Energy	Energy efficiency	219	***Light renovation of other social infrastructures (including pre-school and care centres)***	100 %	40%	40%	40%	• m2 renovated and number of places improved – by types: pre-schools, care facilities, other;	• Annual GHG emissions avoided in tCO2e; • MWh of energy savings; • Average kWh/m2 primary energy (before-after); • Number of annual users of new or modernised facilities – by types: pre-schools, care facilities, others; • Value of assets and / or Population benefitting from climate resilience measures;

Justification

Remove these intervention fields from the list of intervention fields with a gender equality score of 2. They concern infrastructure renovation

measures and do not have a direct or primary objective of contributing to gender equality. Maintaining a score of 2 would risk diluting the credibility and targeting of the gender equality objective; a score of 2 should be reserved for interventions with a clear and direct gender equality focus.

Amendment 1318
Ruggero Razza, Carlo Fidanza
on behalf of the ECR Group

Proposal for a resolution
Annex I – table -row 224 a (new)

Amendment

Policy area (level 1)	Policy area (level 2)	#	Intervention field	CCM	CCA	ENV	SOC	Output indicator	Result indicator
Energia	***Riscaldamento, raffrescamento e cogenerazione***	***224 bis***	***Cogenerazione di calore da energia da fissione nucleare senza raffrescamento***	***100 %***	***0%***	***0%***	***0%***	• ***Capacità di produzione nuova o aggiuntiva installata (in MW);*** • ***Capacità nuova o aggiuntiva installata tramite cogenerazione (in MW);***	

Motivazione

La fissione nucleare è riconosciuta come tecnologia pulita e a zero emissioni nette e gli impianti producono calore decarbonizzato utilizzabile nel teleriscaldamento

e nei processi industriali. La produzione di calore da fissione dovrebbe quindi costituire un settore di intervento specifico, particolarmente importante per i futuri reattori modulari avanzati (AMR), capaci di produrre insieme elettricità stabile a basse emissioni e calore ad alta temperatura, sostituendo le fonti fossili nel teleriscaldamento e nei processi industriali.

Amendment 1325
Ruggero Razza, Carlo Fidanza
on behalf of the ECR Group

Proposal for a resolution
Annex I – table -row 235

Text proposed by the Commission

Policy area (level 1)	**Policy area (level 2)**	**#**	**Intervention field**	**CCM**	**CCA**	**ENV**	**SOC**	**Output indicator**	**Result indicator**

Energia	Idrogeno	235	Produzione di idrogeno a basse emissioni di carbonio e di derivati	***40 %***	0%	0%	0%		

Amendment

Policy area (level 1)	**Policy area (level 2)**	**#**	**Intervention field**	**CCM**	**CCA**	**ENV**	**SOC**	**Output indicator**	**Result indicator**
Energia	Idrogeno	235	Produzione di idrogeno a basse emissioni di carbonio e di derivati	***100%***	0%	0%	0%		

Motivazione

Pur rientrando presumibilmente nella «produzione di idrogeno a basse emissioni di carbonio e di derivati», l'idrogeno prodotto da energia nucleare riceve un coefficiente di mitigazione di appena il 40 %. In linea con la neutralità tecnologica, il coefficiente dovrebbe essere portato al 100 %, per riflettere pienamente il contributo alla mitigazione e garantire parità di trattamento con l'idrogeno rinnovabile (settore #234).

Amendment 1327
Ruggero Razza, Carlo Fidanza
on behalf of the ECR Group

Proposal for a resolution
Annex I – table -row 247 a (new)

Amendment

Policy area (level 1)	**Policy area (level 2)**	**#**	**Intervention field**	**CCM**	**CCA**	**ENV**	**SOC**	**Output indicator**	**Result indicator**

Energia	***Nucleare***	***247bis***	***Ritrattamento e riciclaggio del combustibile nucleare esaurito e produzione di combustibile nucleare avanzato***	***100 %***	***0%***	***0%***	***0%***	• ***Capacità nuova o aggiuntiva installata (tonnellate);*** • ***Volume di combustibile nucleare esaurito ritrattato o riciclato (tonnellate);*** • ***Volume di prodotti nucleari avanzati fabbricati (tonnellate);***	• ***Number of new young farmers and other new entrants in agriculture supported – by gender;***

Motivazione

Le attività del ciclo del combustibile nucleare, in particolare il riciclaggio e il ritrattamento del combustibile esaurito e la produzione di combustibile avanzato, dovrebbero costituire un settore di intervento con coefficiente CCM del 100 %. Il riciclaggio e la produzione di combustibili avanzati come il MOX promuovono la circolarità nel settore nucleare, trasformando un onere economico in una risorsa energetica. Chiudendo il ciclo del combustibile l'Europa può migliorare l'efficienza delle risorse, ridurre volume e radiotossicità dei rifiuti ad alta attività e rafforzare l'autonomia strategica nell'approvvigionamento di combustibile.

Amendment 1338
Jana Nagyová, Klára Dostálová, Jaroslava Pokorná Jermanová, Kateřina Konečná, Ondřej Knotek, Jaroslav Bžoch, Jaroslav Knot, Tomáš Kubín

Proposal for a resolution
Annex I – table -row 284

Text proposed by the Commission

Policy area (level 1)	Policy area (level 2)	#	Intervention field	CCM	CCA	ENV	SOC	Output indicator	Result indicator
Environment and climate	Nature protection and restoration	284	Protection and restoration of terrestrial, coastal and freshwater ecosystems	100 %	100 %	100 %	0%	• Hectares of protected or restored areas; • Number of nature-based solutions improved or established;	• ***Annual GHG emissions avoided in tCO2e;***

Amendment

Policy area (level 1)	Policy area (level 2)	#	Intervention field	CCM	CCA	ENV	SOC	Output indicator	Result indicator
Environment and climate	Nature protection and restoration	284	Protection and restoration of terrestrial, coastal and freshwater ecosystems	100 %	100 %	100 %	0%	• Hectares of protected or restored areas; • Number of nature-based solutions improved or established; • ***Number of projects supported***	

Justification

The removal of the result indicator "Annual GHG emissions avoided" is requested, as this indicator is not relevant for nature restoration. Avoided greenhouse gas emissions are generally not monitored for this type of project, and there is no established basis for their calculation.
The inclusion of the indicator "Number of projects supported" would enable the reporting not only of restoration activities, but also of activities aimed at maintaining the condition of ecosystems. This is particularly important in view of the objectives of the Nature Restoration Regulation.
Please note that the values of area-related indicators are very difficult to predict and are therefore unsuitable as performance-model indicators on

which reimbursement would be based. Within the framework of the intervention, projects of different natures and with different benefits may be reported: some may generate benefits measured in hectares, while others may cover hundreds or thousands of hectares. There may also be overlaps in reported values, for example in the case of monitoring projects or studies. 2

Justification

The removal of the indicator tracking the value of assets is requested. Reporting the value of assets has no connection with nature conservation, and it is neither relevant nor feasible to determine the value of the assets of all persons who will benefit from the implementation of a project.
The inclusion of the indicator "Number of projects supported" would enable the reporting not only of restoration activities, but also of activities aimed at maintaining the condition of ecosystems. This is particularly important in view of the objectives of the Nature Restoration Regulation.
Please note that the values of area-related indicators are very difficult to predict and are therefore unsuitable as performance-model indicators on which reimbursement would be based. Within the framework of the intervention, projects of different natures and with different benefits may be reported: some may generate benefits measured in hectares, while others may cover hundreds or thousands of hectares. There may also be overlaps in reported values, for example in the case of monitoring projects or studies.

Amendment 1347
Jana Nagyová, Klára Dostálová, Jaroslava Pokorná Jermanová, Kateřina Konečná, Ondřej Knotek, Jaroslav Bžoch, Jaroslav Knot, Tomáš Kubín

Proposal for a resolution
Annex I – table -row 289

Text proposed by the Commission

Policy area (level 1)	Policy area (level 2)	#	Intervention field	CCM	CCA	ENV	SOC	Output indicator	Result indicator

Environment and climate	Pollution	289	Actions to improve monitoring and modelling of air quality	0%	0%	100 %	0%	• Pollutant reduction in tonnes (non-CO2e) (PM2.5 and NOX); • Pollutant reduction in tonnes (non-CO2e) (PM2.5 and NOX) [in line with Directive (EU) 2024/2284];	

Amendment

Policy area (level 1)	**Policy area (level 2)**	**#**	**Intervention field**	**CCM**	**CCA**	**ENV**	**SOC**	**Output indicator**	**Result indicator**
Environment and climate	Pollution	289	Actions to improve monitoring and modelling of air quality	0%	0%	100 %	0%	• Pollutant reduction in tonnes (non-CO2e) (PM2.5 and NOX); • Pollutant reduction in tonnes (non-CO2e) (PM2.5 and NOX) [in line with Directive (EU) 2024/2284]; • ***Number of upgraded or newly acquired tools and systems for emission and air quality data management, processing and modelling;***	• ***Area covered by improved air quality monitoring and/or modelling capacity;***

Justification

Output indicator: *The wording in the Commission draft is too narrow, as it focuses only on air quality modelling systems. A broader formulation is needed to reflect the full scope of interventions, including emission inventories, data integration, processing tools, and digital systems supporting air quality assessment. It is proposed to add an indicator on the development and modernisation of comprehensive data management systems necessary for effective air quality monitoring, modelling, and policy implementation.*

Result indicator: *The current indicators focus on installed equipment, such as monitoring stations and modelling systems, but do not capture improvements at system level. The addition of the indicator "Number of air quality zones with improved monitoring and/or modelling capacity" would ensure that the actual impact on air quality management is measured.*

Amendment 1356
Jana Nagyová, Klára Dostálová, Jaroslava Pokorná Jermanová, Kateřina Konečná, Ondřej Knotek, Jaroslav Bžoch, Jaroslav Knot, Tomáš Kubín

Proposal for a resolution
Annex I – table -row 312

Text proposed by the Commission

Policy area (level 1)	**Policy area (level 2)**	**#**	**Intervention field**	**CCM**	**CCA**	**ENV**	**SOC**	**Output indicator**	**Result indicator**

Housing and infrastructure	Social and affordable housing	312	Development and construction of new zero-emission or nearly zero-emission buildings for student accommodation	40%	40%	40%	***100 %***	• m2 constructed and Number of student housing places renovated or added;	• Annual GHG emissions avoided in tCO2e; • MWh of energy savings; • Average kWh/m2 primary energy (before-after); • Number of annual users – by gender; • % Proportion relevant to social housing;

Amendment

Policy area (level 1)	**Policy area (level 2)**	**#**	**Intervention field**	**CCM**	**CCA**	**ENV**	**SOC**	**Output indicator**	**Result indicator**
Housing and infrastructure	Social and affordable housing	312	Development and construction of new zero-emission or nearly zero-emission buildings for student accommodation	40%	40%	40%	***40%***	• m2 constructed and Number of student housing places renovated or added;	• Annual GHG emissions avoided in tCO2e; • MWh of energy savings; • Average kWh/m2 primary energy (before-after); • Number of annual users – by gender; • % Proportion relevant to social housing;

Justification

The 100% social coefficient for intervention fields 312–315 appears substantively inconsistent. For all other social-infrastructure interventions, including closely related fields on student housing and measures to combat homelessness (intervention fields 212, 213, 221 and 222), the Commission proposed a coefficient of 40%. While no coefficients were revised, there is a strong case for correcting cases where comparable intervention fields are assigned different coefficients. The social coefficient for intervention fields 312–315 could therefore be set at 40%, ensuring consistency across comparable fields while maintaining the maximum contribution of infrastructure investments to social objectives at 40%.

Migration and border	Border management and visa	322	Supporting the well-functioning of Schengen area	0%	0%	0%	0%	***• Number of Schengen recommendations implemented;***	• Share of addressed Schengen evaluation recommendations out of total;

Amendment

Policy area (level 1)	Policy area (level 2)	#	Intervention field	CCM	CCA	ENV	SOC	Output indicator	Result indicator
Migration and border	Border management and visa	322	Supporting the well-functioning of Schengen area	0%	0%	0%	0%	• ***Number of staff trained – by gender;*** • ***Number of events (expert meetings/workshops/study visits/training activities/other);*** • ***Number of staff supported that constitute public service for the Union*** • ***Number of IT systems supported – by type of support (developed, maintained, upgraded)*** • ***Number of items of equipment purchased for well functioning of Schengen area – by type: (automated border control systems, including aircraft, drones, maritime transport, land transport, others);***	• Share of addressed Schengen evaluation recommendations out of total;

Justification

The indicator should allow for the counting of all staff trained in areas relevant to this intervention field, rather than being limited to coordinators.
It is proposed to add the following new indicators:
"Number of events (expert meetings, workshops, study visits, training activities and other events)", as the exchange of best practices and international and national coordination form an important part of this field;
"Number of staff supported constituting the public service for the Union", as this output indicator is important for monitoring operating-type

activities.
It is also suggested to remove the exhaustive list of IT systems. As the indicator should remain applicable until 2034, new systems may emerge in the future.

Migration and border	Migration – EU	324	Supporting the common visa policy	0%	0%	0%	0%	• Number of projects supporting the digitalisation of visa processing; • Number of staff deployed to consulates in third countries; – by goal (for visa processing/others) and by gender; • Number of new or upgraded consulates outside the Schengen area – by type of upgrade (upgraded to enhance client-friendliness for visa applicants/others); • Number of staff trained – by gender; • Number of administrative units upgraded;	• Share of addressed recommendations from Schengen evaluations in the area of the common visa policy; • Number of initiated/improved forms of cooperation set up among Member States in visa processing; • Share of participants who report three months after the training activity that they are using the skills and competences acquired during the training;

Amendment

Policy area (level 1)	**Policy area (level 2)**	**#**	**Intervention field**	**CCM**	**CCA**	**ENV**	**SOC**	**Output indicator**	**Result indicator**

.contexte OBTAINED BY OBTENU PAR

Migration and border	Border management and visa	324	Supporting the common visa policy	0%	0%	0%	0%	• Number of projects supporting the digitalisation of visa processing; • Number of staff deployed to consulates in third countries; – by goal (for visa processing/others) and by gender; • Number of new or upgraded consulates outside the Schengen area – by type of upgrade (upgraded to enhance client-friendliness for visa applicants/others); • Number of staff trained – by gender; • Number of administrative units upgraded; • ***Number of events (expert meetings/workshops/study visits/training activities/other);*** • ***Number of items of equipment purchased and fully functioning– by type;*** • ***Number of staff supported that constitute public service to the Union;*** • ***Number of IT systems supported and fully functioning – by type of support (developed, maintained, upgraded);***	• Share of addressed recommendations from Schengen evaluations in the area of the common visa policy; • Number of initiated/improved forms of cooperation set up among Member States in visa processing; • Share of participants who report three months after the training activity that they are using the skills and competences acquired during the training;

Justification

It is proposed to add the following new indicators: "Number of events (expert meetings, workshops, study visits, training activities and other events)", as the exchange of best practices and international and national coordination form an important part of this field; "Number of equipment purchases", as this would allow activities targeting new technologies and other equipment-related actions to be captured; "Number of staff

supported constituting the public service for the Union", as this output indicator is important for monitoring operating-type activities.
For the indicator "Number of large-scale IT systems supported, by type of support (developed, maintained, upgraded)", it is suggested to delete the term "large-scale". Many other national IT systems are relevant for border management and the Schengen area, and the interoperability of systems is important; such systems should therefore not be excluded from the indicator.

								places for unaccompanied minors, families, total; • ***Number of renovated places in reception infrastructure in accordance with Union acquis, separately specifying: number of places for unaccompanied minors, families, total;***	

Justification

It is proposed to add the following new indicators: "Number of asylum-related decisions issued", as this would allow the outcomes of asylum procedures funded through Union support of an operational nature to be measured; "Number of administrative units upgraded", as asylum administration is an important part of this area, similarly to intervention field 324; "Number of events (expert meetings, workshops, study visits, training activities and other events)", as the exchange of best practices and international and national coordination form an important part of this field; "Number of equipment purchases", as this would allow activities targeting new technologies and other equipment-related actions to be captured; "Number of staff supported constituting the public service for the Union", as this output indicator is important for monitoring operating-type activities.
For the indicator "Number of participants supported", it is necessary to allow other types of support to be reported. The list should not be exhaustive, as it does not cover other forms of support such as social counselling, psychological care or counselling, and professional guidance.
Number of newly created places... + Number of renovated places...:Places in reception infrastructures do not have assigned gender. Places are not built as gender specific.

Migration and border	Migration – EU	329	Contributing to countering irregular migration, enhancing effective, safe and dignified return and readmission, and promoting and contributing to effective initial reintegration in countries of origin (Internal EU policy only)	0%	0%	0%	0%	• Number of returnees who received re-integration assistance – by gender; • Number of places in detention centres created; • Number of places in detention centres refurbished or renovated; • Number of staff trained – by gender;	• Number of returnees with EU support– by return status (voluntarily returned/ who were removed) and by gender; • Share of participants to trainings who report three months after the training activity that they are using the skills and competences acquired during the training; • Share of addressed Schengen evaluation recommendations out of total;

contexte OBTAINED BY · OBTENU PAR

Amendment

Policy area (level 1)	Policy area (level 2)	#	Intervention field	CCM	CCA	ENV	SOC	Output indicator	Result indicator
Migration and border	Migration – EU	329	Contributing to countering irregular migration, enhancing effective, safe and dignified return and readmission, and promoting and contributing to effective initial reintegration in countries of origin (Internal EU policy only)	0%	0%	0%	0%	• Number of returnees who received re-integration assistance – by gender; • Number of places in detention centres created; • Number of places in detention centres refurbished or renovated; • Number of staff trained – by gender; • ***Number of returnees– by return status (voluntarily returned/ who were removed) and by gender;***	• Number of returnees with EU support– by return status (voluntarily returned/ who were removed) and by gender; • Share of participants to trainings who report three months after the training activity that they are using the skills and competences acquired during the training; • Share of addressed Schengen evaluation recommendations out of total;

Justification

The indicator "Number of returnees" should be moved from the result indicators to the output indicators. Measures must be linked to exactly one output indicator. For measures targeting returns, there is currently no related output indicator: the existing indicator covers reintegration, but not returns as such.

.contexte OBTAINED BY · OBTENU PAR

Research and innovation	Basic research	339	Frontier research, training of researchers, and research infrastructures**	40%	40%	40%	0%	• Number of peer-reviewed research outputs (publications, conference proceedings, etc.); • ***Number of operations*** • ***Number of IT systems by type of support (developer, maintained, modernised)*** • ***Number of supported enterprises or institutions by type (SMEs, start-ups, scale-ups, research institutions, other);***	• Citations of peer-reviewed research outputs; • Share of researchers with increased individual impact in their field-by gender; • Citations of research outputs (any type) available in open access; • Number of granted IPR; • Number of patent citations; • Number of patent families (innovations); • Public and private investments mobilised after participation, including investments in SMEs and start-ups (EUR);

Justification

Output indicators: "Number of operations" is a general indicator with clear informative value, not only in the field of agriculture but also across other fields of support, in particular intervention fields 339, 339a and 382. Its inclusion would neither increase the administrative burden nor expand the indicator framework. In addition, "Number of IT systems supported" should be included, as IT systems may also constitute a crucial part of the support under this intervention field. For the indicator "Number of supported enterprises", monitoring should not be limited to SMEs, start-ups and scale-ups. It should also cover research organisations, public institutions and other entities, including consortia, particularly for interventions aimed at creating an enabling environment for research excellence or for knowledge and technology transfer.

Proposal for a resolution

Annex I – table -row 339 a (new)

Amendment

Policy area (level 1)	Policy area (level 2)	#	Intervention field	CCM	CCA	ENV	SOC	Output indicator	Result indicator
Research and tehcnlogy infrastructures	***Basic research***	***339a***	***Research and technology infrastructures***	***40%***	***40%***	***40%***	***X%***	• ***Number of supported enterprises or institutions by type (SMEs, start-ups, scale-ups, research institutions, other);*** • ***Nominal value of equipment for research and innovation*** • ***Number of supported enterprises or institutions by type (SMEs, start-ups, scale-ups, research institutions, other);*** • ***Number of operations;***	

Justification

For the indicator "Number of supported enterprises", monitoring should not be limited to SMEs, start-ups and scale-ups. It should also cover research organisations, public institutions and other relevant entities, including consortia, particularly for interventions aimed at creating an enabling environment for research excellence or for knowledge and technology transfer.

It is proposed to introduce an indicator "Nominal value of equipment for research and innovation", in order to monitor investments in capital assets in the area of research and technological infrastructure.

It is also proposed to add an indicator "Number of operations". This is a general indicator with clear informational value, not only for agriculture-related intervention fields but also across other support areas, particularly intervention fields 339, 339a and 382. Its inclusion would not increase the administrative burden or require any expansion of the indicator framework.

Amendment 1379
Jana Nagyová, Klára Dostálová, Jaroslava Pokorná Jermanová, Kateřina Konečná, Ondřej Knotek, Jaroslav Bžoch, Jaroslav Knot, Tomáš Kubín

Proposal for a resolution
Annex I – table -row 340-381

Amendment

Policy area (level 1)	Policy area (level 2)	#	Intervention field	CCM	CCA	ENV	SOC	Output indicator	Result indicator
Research and innovation		***340 - 381***		%	%	%	%	• ***Number of enterprises supported – by micro, small & medium, large;***	

Justification

Replacing "Number of supported enterprises" with "Number of supported enterprises, by type (SMEs, start-ups, scale-ups)", or adding such an indicator, would better reflect the full spectrum of actors involved in complex research and innovation ecosystems and align with the objective of strengthening integrated value chains. Strategic projects often rely on cooperation between enterprises of different sizes, including large enterprises acting as system integrators and anchors for innovation ecosystems, thereby stimulating the participation of SMEs and start-ups and increasing private investment. The proposed breakdown would ensure greater flexibility and policy relevance, while remaining consistent with established statistical categories and enabling robust and comparable monitoring across programmes, including, importantly, the ECF.

While this indicator is essential for broadly defined intervention fields, its inclusion should also be considered for the more sector-specific intervention fields 344–381.

Research and innovation	Capital assets	340	Investment in fixed assets, including research infrastructure, directly linked to R&I	0%	0%	0%	0%	• Number of supported researchers – by gender, career stage and country of origin; • Share of research outputs (all types) available in open access; • Number of supported enterprises by type (SMEs, start-ups, scale-ups); • Number of IPR applications (including patents, trademarks, etc.); • Number of employees in legal entities supported by EU funding; • Public and private co-investment in EU funded projects (EUR); • Share of projects with end-user and citizen engagement activities; • Number of projects and EU contribution to projects integrating the gender dimension (EUR);	• Citations of peer-reviewed research outputs; • Share of researchers with increased individual impact in their field-by gender; • Citations of research outputs (any type) available in open access; • Number of granted IPR; • Number of patent citations; • Number of patent families (innovations); • Public and private investments mobilised after participation, including investments in SMEs and start-ups (EUR);

Amendment

Policy area (level 1)	**Policy area (level 2)**	**#**	**Intervention field**	**CCM**	**CCA**	**ENV**	**SOC**	**Output indicator**	**Result indicator**

Research and innovation	Capital assets	340	Investment in fixed assets, including research infrastructure, directly linked to R&I	0%	0%	0%	0%	• Number of supported researchers – by gender, career stage and country of origin; • Share of research outputs (all types) available in open access; • Number of supported enterprises by type (SMEs, start-ups, scale-ups); • Number of IPR applications (including patents, trademarks, etc.); • Number of employees in legal entities supported by EU funding; • Public and private co-investment in EU funded projects (EUR); • Share of projects with end-user and citizen engagement activities; • Number of projects and EU contribution to projects integrating the gender dimension (EUR);***Area of business infrastructure created or upgraded (m2)***	• Citations of peer-reviewed research outputs; • Share of researchers with increased individual impact in their field-by gender; • Citations of research outputs (any type) available in open access; • Number of granted IPR; • Number of patent citations; • Number of patent families (innovations); • Public and private investments mobilised after participation, including investments in SMEs and start-ups (EUR);

Justification

Within intervention field 66, which concerns business infrastructure and technology parks, the new output indicator expressed in square metres and the new result indicator on the number of enterprises benefiting from this new infrastructure are appropriately defined.
Intervention field 340 also concerns infrastructure, in this case research infrastructure, which may include science and technology parks, business incubators and other innovation centres. It would therefore be relevant to assign to intervention field 340 the infrastructure indicators applicable to intervention field 66, in particular "Area of business infrastructure created or upgraded (m²).

Amendment

Policy area (level 1)	Policy area (level 2)	#	Intervention field	CCM	CCA	ENV	SOC	Output indicator	Result indicator
Research and innovation	Horizontal	372	Promoting international research, ***innovation*** and international cooperation	0%	0%	0%	0%	• Number of supported researchers – by gender, career stage and country of origin; • Share of research outputs (all types) available in open access; • Number of supported enterprises by type (SMEs, start-ups, scale-ups); • Number of IPR applications (including patents, trademarks, etc.); • Number of employees in legal entities supported by EU funding; • Public and private co-investment in EU funded projects (EUR); • Share of projects with end-user and citizen engagement activities; • Number of projects and EU contribution to projects integrating the gender dimension (EUR);	• Citations of peer-reviewed research outputs; • Share of researchers with increased individual impact in their field-by gender; • Citations of research outputs (any type) available in open access; • Number of granted IPR; • Number of patent citations; • Number of patent families (innovations); • Public and private investments mobilised after participation, including investments in SMEs and start-ups (EUR);

Justification

It is requested to modify the IF to "Promoting international research, innovation and international cooperation". The current wording does not fully reflect the role of innovation-related activities within international collaboration. In practice, internationalisation in R&I inherently involves innovation access, co-development and joint market-oriented activities, beyond research cooperation alone. At the same time, Annex I lacks a

horizontal intervention field explicitly covering the international dimension of innovation, including participation in EU and intergovernmental initiatives and cross-border innovation partnerships. We further believe that the proposed adjustment better reflects the integrated nature of R&I activities and strengthens the focus on synergies, international value chains and uptake of results, while providing a clearer framework for supporting internationalisation efforts with a strong innovation dimension (our emphasis), with clear synergies with ECF instruments.

Motivazione

In linea con il principio di neutralità tecnologica, il coefficiente CCM del 40 % per la ricerca e lo sviluppo nella fissione nucleare dovrebbe essere portato al 100 %, cioè al coefficiente già assegnato alla ricerca e sviluppo nella fusione nucleare (settore #381) e alle altre attività di ricerca e sviluppo a zero emissioni nette (settore #369), per garantire parità di trattamento.

Research and Innovation	Nuclear	380	Fission	***100*** %	0%	0%	0%	• Number of peer-reviewed research outputs (publications, conference proceedings, etc.); • Number of supported researchers – by gender, career stage and country of origin; • Share of research outputs (all types) available in open access; • Number of supported enterprises by type (SMEs, start-ups, scale-ups); • Number of IPR applications (including patents, trademarks, etc.); • Number of employees in legal entities supported by EU funding; • Public and private co-investment in EU funded projects (EUR); • Share of projects with end-user and citizen engagement activities; • Number of projects and EU contribution to projects integrating the gender dimension (EUR);	• Citations of peer-reviewed research outputs; • Share of researchers with increased individual impact in their field-by gender; • Citations of research outputs (any type) available in open access; • Number of granted IPR; • Number of patent citations; • Number of patent families (innovations); • Public and private investments mobilised after participation, including investments in SMEs and start-ups (EUR);

Justification

Research on nuclear fission fully contributes to climate change mitigation objectives, covering the optimisation of the existing fleet, the development of small and advanced modular reactors (SMRs and AMRs), and advanced digital tools serving the performance and resilience of energy systems. Through its close link between research, innovation and industrial application, it delivers concrete decarbonisation solutions in the short and medium term, while providing safe, competitive and low-carbon energy. The 40% coefficient is therefore inconsistent with the actual climate benefits of fission research, and with the principle of technological neutrality that should guide the Union's performance framework: comparable low-carbon research fields, such as fusion and CCUS, are both weighted at 100%. Aligning fission research at 100% ensures a technology-neutral approach across comparable low-carbon research fields and avoids compromising future research efforts.

Proposal for a resolution
Annex I – table -row 450

Text proposed by the Commission

Policy area (level 1)	**Policy area (level 2)**	**#**	**Intervention field**	**CCM**	**CCA**	**ENV**	**SOC**	**Output indicator**	**Result indicator**

Social	Food and material support	450	Addressing material deprivation through food and/or material assistance to the most deprived, including accompanying measures ***(not in case of disasters)***	0%	0%	0%	100 %	• Number of end recipients – by gender, by age and by type of support	• Investigations initiated in EMPACT operations; • Arrests made in EMPACT operations; • Assets seized in EMPACT operations in estimated EUR value; • Number of administrative units with existing mechanisms/ procedures/ tools/ guidance for cooperation with other Member States or Union bodies; • Number of staff involved in cross-border operations; • Share of Schengen evaluation recommendations addressed out of the total;

Amendment

Policy area (level 1)	**Policy area (level 2)**	**#**	**Intervention field**	**CCM**	**CCA**	**ENV**	**SOC**	**Output indicator**	**Result indicator**

.contexte OBTAINED BY OBTENU PAR

Social	Food and material support	450	Addressing material deprivation through food and/or material assistance to the most deprived, including accompanying measures	0%	0%	0%	100 %	• Number of end recipients – by gender, by age and by type of support	• Investigations initiated in EMPACT operations; • Arrests made in EMPACT operations; • Assets seized in EMPACT operations in estimated EUR value; • Number of administrative units with existing mechanisms/ procedures/ tools/ guidance for cooperation with other Member States or Union bodies; • Number of staff involved in cross-border operations; • Share of Schengen evaluation recommendations addressed out of the total;

Justification

The draft ESF regulation stipulates that food and material assistance in case of natural disasters can be supported. However, in the list of intervention fields there is currently no code for it. Hence, it is suggested the deletion of the text in brackets to make sure, that IF 450 can be used also in case of natural disasters.

.contexte OBTAINED BY · OBTENU PAR

Social	Health	455	Health promotion and disease prevention, excluding health impacts of climate change	0%	0%	0%	100 %	• Number of health campaigns carried out – by campaigns involving a medical examination or treatment (screening programmes, vaccination…) and information and promotion campaigns; • ***Number of health initiatives carried out (disaggregated by type of action: screening, vaccination, addressing health determinants, mental health promotion, substance use and addiction problems, other medical examination) or public health actions);***	• Vaccination coverage for children (e.g. measles); • Vaccination coverage for adults (e.g. seasonal influenza, human papillomaviruses) – by gender; • Screening coverage for breast, cervical and colorectal cancer screening programmes – by gender; • Population covered by Cancer Registries reporting information on cervical, breast, colorectal and paediatric cancer stage at diagnosis – by gender • Number of 1-year olds fully immunised with EU support;

Justification

Given the broad scope of health promotion and disease prevention interventions, the introduction of an indicator measuring the population covered by health promotion information campaigns, including on mental health, is welcome.

Or. en

Amendment 1444
Jana Nagyová, Klára Dostálová, Jaroslava Pokorná Jermanová, Kateřina Konečná, Ondřej Knotek, Jaroslav Bžoch, Jaroslav Knot, Tomáš Kubín

Proposal for a resolution
Annex I – table -row 486

Text proposed by the Commission

Policy area (level 1)	Policy area (level 2)	#	Intervention field	CCM	CCA	ENV	SOC	Output indicator	Result indicator
Social	Social inclusion	486	Other social infrastructures (including pre-school and care centres) – Development and construction of new zero-emission or nearly zero-emission buildings	100 %	40%	40%	40%	• m² constructed and increased capacity (number of places) – by types: pre-schools, care facilities, other;	• Annual GHG emissions avoided in tCO2e; • MWh of energy savings; • Average kWh/m2 primary energy (before-after); • Number of annual users of new facilities – by types: pre-schools, care facilities, others – by gender; • Pollutant reduction (PM2.5 and NOx) in tonnes;

Amendment

Policy area (level 1)	Policy area (level 2)	#	Intervention field	CCM	CCA	ENV	SOC	Output indicator	Result indicator
Social	Social inclusion	486	Other social infrastructures (including pre-school and care centres) – Development and construction of new zero-emission or nearly zero-emission buildings*	100 %	40%	40%	40%	• m² constructed and increased capacity (number of places) – by types: pre-schools, care facilities, other;	• Annual GHG emissions avoided in tCO2e; • MWh of energy savings; • Average kWh/m2 primary energy (before-after); • Number of annual users of new facilities – by types: pre-schools, care facilities, others – by gender; • Pollutant reduction (PM2.5 and NOx) in tonnes;

Justification

Remove this intervention field from the list of intervention fields with gender equality score 2. This intervention field relate to infrastructure renovation measures and do not have a direct or primary objective contributing to gender equality. Maintaining a score 2 classification risks diluting the credibility and targeting of the gender equality objective; score 2 should be reserved for interventions with a clear and direct gender equality focus.

Amendment 1453
Stine Bosse, Gerben-Jan Gerbrandy

Proposal for a regulation
Annex II – part 1

Text proposed by the Commission	*Amendment*
Part 1: CODES FOR THE TERRITORY TYPE DIMENSION (I)	Part 1: CODES FOR THE TERRITORY TYPE DIMENSION (I)
01 Urban areas	01 Urban areas
02 Rural areas	02 Rural areas
03 Areas affected by industrial transition	03 Areas affected by industrial transition
04 Islands and coastal areas	04 Islands and coastal areas
05 Other types of territories targeted	***04a Mountain areas***
06 Sparsely populated areas	05 Other types of territories targeted
07 No territorial targeting	06 Sparsely populated areas
	06a Cross-border areas

07	No territorial targeting

Or. en

Justification

Taking into account Articles 174 and 349 TFEU, the performance monitoring framework should recognise the specific constraints of rural areas, areas affected by industrial transition, and regions which suffer from severe and permanent natural or demographic handicaps such as regions with very low population density and island, cross-border, mountain regions as well as outermost regions. The framework should provide for those specific circumstances to be incorporated into the design and assessment of the performance indicators, and for the regional and local authorities concerned to be involved in the relevant monitoring and reporting mechanisms, in order to ensure that EU funds are used more efficiently and fairly in those areas and in order to give operational effect to the right to stay principle.

Amendment 1454
Daniel Freund, Rasmus Nordqvist
on behalf of the Verts/ALE Group

Proposal for a regulation
Annex II – part 2

Text proposed by the Commission		*Amendment*	
Part 2: CODES FOR THE TERRITORY TYPE DIMENSION (II)		Part 2: CODES FOR THE TERRITORY TYPE DIMENSION (II)	
01	Outermost regions	01	Outermost regions
02	Small Aegean Islands	02	Small Aegean Islands
03	Eastern border region	03	Eastern border region
04	Northern sparsely populated areas	04	Northern sparsely populated areas
		05	***Mountain areas***

Or. en

Justification

Article 174 TFEU requires particular attention to be paid to mountain regions. A dedicated code will ensure that EU spending in these areas is identified and tracked.

Amendment 1455
Jean-Marc Germain, Thomas Pellerin-Carlin
on behalf of the S&D Group

Proposal for a regulation
Annex II – part 4

Text proposed by the Commission	*Amendment*
Part 4: LOCATION (NUTS2)	Part 4: LOCATION (NUTS2***/NUTS3***)
XX | Code of region or area where operation is located or carried out, as set out in the common classification of territorial units for statistics (NUTS) provided in Annex I to Regulation (EC) No 1059/2003.	XX | Code of region or area where operation is located or carried out, as set out in the common classification of territorial units for statistics (NUTS) provided in Annex I to Regulation (EC) No 1059/2003.

Or. en

Amendment 1456
Daniel Freund, Rasmus Nordqvist
on behalf of the Verts/ALE Group

Proposal for a regulation
Annex II – part 4

Text proposed by the Commission	*Amendment*
Part 4: LOCATION (***NUTS2***)	Part 4: LOCATION (***NUTS3***)
XX | Code of region or area where operation is located or carried out, as set out in the common classification of territorial units for statistics (NUTS) provided in Annex I to Regulation (EC) No 1059/2003.	XX | Code of region or area where operation is located or carried out, as set out in the common classification of territorial units for statistics (NUTS) provided in Annex I to Regulation (EC) No 1059/2003.

Or. en

Justification

NUTS 2 regions are too large to show where EU-funded measures are located, as regional averages hide intraregional differences. NUTS 3 location data make it possible to better assess territorial needs and track spending at territorial level.
